

Global warming speech assignment

**ASSIGN
BUSTER**

Something as simple as walking instead of taking the car will help reduce fumes. As well as stopping pollution, you are giving yourself exercise, something important for our bodies. So the next time you get into your car, think do I have to make this journey by vehicle or can I walk? When you are at home, and your getting a little cold. Put a jumper on instead of turning on the heater. The extra heat produced by our homes also affects the planet. So try wearing an extra layer in winter. If possible, buy your fruit and vegetables from local suppliers. And try to avoid imported goods.

The more foreign food that we import the more pollution from airplanes ND boats it will create-Keeping to the speed limit can also help the environment. The more you speed the more petrol you are going to use, making the pollution higher. Also, Subs make about six times their own weight in CO each year. A small efficient diesel car covering the same distance not only uses much less fuel; it makes two thirds less. Elf possible use solar energy, after all it is free; all you need to buy is the equipment. You can get much of your hot water and heating from the sun and even generate electricity. Reduce, reuse and recycle.

Only buy whatnot need; don't stock the boards with things you may or may not use. Reuse whatever you can, like containers and paper, and recycle what you cannot reuse. It really is as simple as that. Finally turning off unused sources of power such as televisions and heaters will help the environment, as well as save you money. Elf everybody stuck to these rules, we would be doing a great thing by protecting the earth. So please take into consideration what have said, and try to do your part.
