**ASSIGN
BUSTER**

So your claim that no such problem at the above said godson is not based on the ground reality. Today I have visited another godson at 16, Crabbier Road, Kola – 700020 at 2 p. M. As per your instruction: the condition of this is shoddier in compare to the previous one and what I am facing there mentioned as under. 1) Ones again there are no proper air ventilation in the godson, but our C & F A assure that he will provide some arrangement shortly. 2) Ones again there are no chair, table, computer, printer, internet connection which are indispensable to monitor timely dispatches to trade parties. You are once again requested to provide current dated closing stock as all items stay in same godson and if I not get proper stock with proper packing case then how can I bifurcate them as trade parties stock and monitor timely dispatches. 4) Internet connection with office and with billing stuff is needed as at the time of dispatches if I found any damage item or anything else, then I can inform the billing personal about the rectification and then make printout of the correct invoice and ensure dispatch timely.) There are no proper arrangements for drinking water, toilet, such as basic amenities. And this godson, may be treated as auxiliary of the main godson (5/H, Titillate Road, Kola -39) and no regular dispatches made from here, so how can I will monitor the same from here? From tomorrow onwards, I will visit the godson and find everything in order then I can start the assignment, If not then I have to come to office to collect stock statement in the morning and in the evening to built smooth dispatch mechanism and for my attendance.

For this I have taken a formal permission from you through this report.
