assignment is due Socrates and Meletus Regarding Socrates's Trial

Introduction The trial of Socrates was one of the interesting occurrences in Athens. Indeed, it indicates the accusations, which were leveled against Socrates and the manner they defended themselves. The essay is a discussion on the ways Socrates and Meletus regraded Socrates's trial.

Discussion

During Socrates's trial, one of the people commented that the estates belonging to one of the Athenian aristocrats were confiscated by the oligarchy (Doug 29). Indeed, the remark was meant to spark the tension between the oligarchs and the Athenians, breaching the peace that had existed in the region. The first argument was that Meletus argued that Socrates were corrupting the young people and deserved punishment (Doug 30). Through the secret acquisition of occupation, Socrates predicted that the son would equally be disgraceful of the propensity, therefore, would advance in the career and Athens were to defend themselves, thus became uncontrolled and insolent (Doug 31).

Linking the arguments to admission, a student who is secretly admitted at the institution secretly, without the formal approval of the authority, might do well in the academic discipline he/she is pursuing. This indicates that the perfect pursuit of the career depends on the individual's determination and interest, not the mode of admission. However, most people believe that the admission procedure depicts that success of the student, thus, a real fallacy. In fact, when one lacks substantial evidence against the other fellow, he/she does not have the capability of victimizing the person on the unjustified wrong. This implies that, the evidence has to prove reliable before holding <https://assignbuster.com/socrates-and-meletus-regrading-socrates-trial/>

one responsible for the offence.

Conclusion

In sum, the Socrates defended all the accusations, which were labeled against them. On the other hand, the Athenians as well were not silenced, but, had to present their argument.
