BUSTER**

Time direction is really of import and it may really impact person 's overall public presentation and accomplishments. However, all of these are related by how persons manage their clip to accommodate their day-to-day life or to do it flux steadily with their modus operandis. Conducive scenes and environment will certainly advance positive results to the pupils, besides holding good talks given by their lectors. Nevertheless, pupils ' clip direction can be considered as one of the facet that can travel a pupil to be a good pupil. A good clip direction is critical for pupils to stand out. However, some of the pupils do non hold a good clip direction accomplishments that has negatively impact their life and their survey. The use of clip by pupils in higher instruction establishments is related to their day-to-day modus operandis and activities. Students ' clip direction can besides impact stress degree of pupils as they need to get by with their undertakings and their personal errands.

In educational establishments of Malaysia, clip direction has a function in finding how the pupils perform. This includes the pupils who are specialising in the instruction profession. Teaching profession is one of legion professions accepted widely throughout the whole universe. Due to this peculiar ground, higher acquisition establishments all around the universe nowadays provide class which either closely or straight related to the learning profession. The acquisition establishments in Malaysia are non excluded. Here in Malaysia, higher learning establishment provides educational classs in assorted fields of survey. Many learning establishments have their ain Faculty of Education to provide the demands and the pupils to foster their surveies in this peculiar field. Among these universities are Universiti Pendidikan Sultan Idris (UPSI) ,

Universiti Malaya (UM) , Universiti Malaysia Sarawak (UNIMAS) , International Islamic University Malaysia (IIUM) , Universiti Kebangsaan Malaysia (UKM) , Universiti Malaysia Sabah (UMS) , Universiti Putra Malaysia (UPM) , Universiti Sains Malaysia (USM) , Universiti Teknologi Malaysia (UTM) and Universiti Teknologi Mara (UiTM) .

The pupils who are undergoing the classes under the Faculty of Education are being exposed to what they should cognize and fix for the educational field besides the cognition that they gain during category. All of the pupils are being trained in bettering both their cognition and besides their soft accomplishments. However, all of the pupils do non hold the same manner of pull offing their clip. This may hold an consequence both on theiracademicand societal life.

In order to find how pupils manage their clip, a survey demand to be carried out among pupils who are taking the B. Ed. in Teaching English as a Second Language (TESL) programme at the Faculty of Education, UiTM Shah Alam. This survey is specifically for Part 8 or concluding semester pupils who are presently analyzing under the TESL programme.

Statement of the Problem.

Students in every university are different from one another, particularly in the manner they manage their clip. The manner of managing clip for each person is different in UiTM even though the classes taken are the same. Some of the pupils are even analyzing in the same category. Some category will hold the session of a peculiar topic in the forenoon and some possibly

holding it in the afternoon or even later in the eventide. The clip allotment of the category may impact the pupils ' clip directions. In other words, pupils manage their clip to suit their demands and most of them pull off their clip by prioritising on what they want to make, instead than what they need to make. This consequences in the troubles of the pupils in executing their undertakings based on what they planned. Therefore, it is necessary to transport out a survey in order to find how pupils manage their clip, and how it affects their surveies.

A survey demand to be conducted to happen out how the pupils manage their clip throughout their period of survey and how it may impact their surveies. The pupils are larning harmonizing to the timetable provided by the module that may or may non disrupt their common day-to-day activities. The pupils have different ways to pull off their clip to provide to their survey program. This survey is conducted to place portion 8 TESL pupils of UiTM clip direction and how it affects their surveies.

Research Aims

The chief aim of the research is to find the ways portion eight B. Ed. TESL (Hons) pupils in the Faculty of Education, Universiti Teknologi Mara (UiTM) , Section 17 Shah Alam, pull off their clip.
