Everyone feels the effects of a bad economy in various ways. Aside from the impact on our jobs and our wallets, turbulent economic conditions create anxiety and can affect the ways in which people perceive their current situation, as well as their opportunities for the future. Many may be surprised by the fact that crime rates seem to be related to our generally gloomy economy. An uncertain economy creates a general sense of vulnerability among citizens. An argument can certainly be made that the relationship between crime rates and economic conditions occurs due to a widespread sentiment that legitimate opportunities are scarcer for populations vulnerable to engaging in crime. Both unemployment and crime may be symptomatic of this uncertainty, and also create more anxiety as they rise during unsettled times.
