

Problems where the
medical and disease
model fits.

Problems in Living9/13/2004Class ScriptureIsaiah 42: 3A bruised reed shall he not break, and the smoking flax shall he not quench: he shall bring forth judgment unto truth. When you working with someone who is wounded, the heart has been damaged.

So, when you work with this person, you must know how to love them and not break them. You find a way to structure them and contain them and not break them. 1. Psychiatry means medical - therefore you use the medical model. a. The medical model does not fit when applied with scripture. b. The medical model uses a disease format.

c. Any problem has to be labeled as a disease. i.

e. alcoholism is labeled as a disease. 2. Four Layers of Psycho Pathologya.

The brain layer - the context with the brain layer is the brain as an organ. i.

This is where the medical and disease model fits. ii. Brain as an organ is the territory of the neurologist. iii. Conditions where we can see (MRI) damage.

iv. It is measurable brain pathology. v.

Some people put ADHD at this level. vi. Alzheimer's is at this level. b.

Rhythm Layer (Systems) - The body has drive states (appetites). i. Sleeping, eating, sex are rhythms. ii. Bi-polar disorder is a rhythmic thing. iii.

Eating and sex addictions (process addictions) - you carry the drug in your head. iv. ADHD technically belongs here. c. Character Driven - Character is the same as personality. i. Personality is the sum of all your experiences.

ii. It is how your thoughts, behaviors and emotions are organized. d.
