

Evolution and religion

[Business](#)

I believe evolution should not be taught in school. Why should this theory be allowed but religion is not? Some people think it's wrong for Christianity to be a subject of learning in school. How does it make sense that the teachings of religion can't be taught but evolution can be. Evolution is a theory that many do not believe. So don't even say that religion can not be taught because not everyone believes it.

Not everyone believes your theory either! I strongly disagree that evolution happens. Yet I still have to learn about it in school. I believe that if we are forced to learn about evolution, that we should also have religion classes. In my point of view I believe religion should not be taught in school.
