## Miscommunication between Teachers In Terms Of Culture, Language, Generation Differences

### Introduction

The relationship between teachers and their students influence the process of learning. Miscommunication in most cases lead to improper information discourse. Drawbacks in communication may rise from differences inherent in culture, language as well as generational differences. In the following discourse, the paper delves into the relevance of the above in miscommunication between teachers and students.

### Context

There is the occurrence of what has largely been referred to as the generational change. The advent of the new media has brought with it new possibilities. This has led to a developing a wide gap between teachers, most of whom belong to the previous generation, and their students, who embrace the new communication technology thereby creating a divide between the two. This leads to multiple misunderstandings which go as afar as affecting how teachers teach and students learn.

### Definition of Phrases used

In the study, a number of new terms used will include:

Conceptual

New media- the internet

Global village- a whole inclusive world made possible by the internet use.

### Review of Literature

This will help understand the topic and the issues raised by previous writers

on miscommunication between teachers and students in terms of culture, language, and generation differences.

Hypothesis: Miscommunication between Teachers and Students are due to Culture, Language, and Generation Differences

These are questions that will aid the determination of the research problem.

Some of these will include:

How does the internet affect physical interaction between teachers and their students?

What are the most common differences exhibited by the teachers from their students?

Method of data collection

The study will use a number of data collection techniques including interviews, the use of questionnaires, and observation.

Method of analysis

The data obtained will be analyzed through a number of ways. It will be statistically analyzed through quantitative as well as qualitative techniques. Besides, primary and secondary documents will also be evaluated through thorough scrutiny and extensive reading to authenticate similarity of facts.

Summary

Change is inevitable; the changes in communication mechanisms have made the world a global village thereby making communication easier. However, this has had a number of influences with the education sector being affected the most.
