

# Ap psychology learning scientists

Science

**ASSIGN  
BUSTER**

Albert Bandura pioneer in observational learning

-Bobo doll experiment John Garcia Taste Aversions

-Rats avoid flavor associated with illness

-contradicts the idea that unconditioned stimulus conditions stimulus ONAP

PSYCHOLOGY LEARNING SCIENTISTS SPECIFICALLY FOR YOU FOR ONLY \$13.

90/PAGE Order Now Ivan Pavlov classical conditioning

-paired neural stimulus (bell) with meat powder (dog salivate) Robert

Rescorla - Showed animals can learn predictability of an event B. F.

Skinner Skinner Box (Operan Chamber)

-reinforcement increases behavior Edward Thorndike Cats in box trail and error

-learn faster for a reward

-Law and Effect Edward Tolman Latent learning and mental maps

-rats in a maze John B. Watson behaviorist and classical conditioning

-wanted to know if emotion was innate

-Little Albert Giacomo Rizzolatti mirror neurons in frontal and parietal cortex in macaque monkey (explains empathy) Martin Seligman Conducted

experiments with dogs that led to the concept of "learned helplessness"
