BUSTER**

Audrey Smedley and Brian D. Smedley, " Changing Perspectives on Human Variation in Science" CA: Race is not biology. Race is a social construct that is deeply ingrained in social psyche.

Summary:

Race isn't biological

Allelic, not genetic variations

More variation within pop. than between

Pop. geneticists wanted to prove through IQ tests & blood tests

Mary Waters, " Immigrants and American Race Relations" CA:

**Institutional anti-blackness

The story of West Indians tells us that American society is still experiencing institutional racism - with immigrant groups gaining success by defining themselves as " not black" and thus reinforcing the belief that blacks are inferior to other races.

Paul Finkleman, " Making a Covenant with Death: Slavery and the Constitutional Convention" CA:

A closer examination of the Constitution reveals that as a result of unfair compromise between the North and the South, slavery was sanctioned by the Constitution even though there was plenty economic and political (not moral) opposition to slavery.

Connections:

Possessive Investment in Whiteness

Stevenson - Race and Slavery in the US (Ironic because owned slave, black people have no worth other than providing for whites i. e. Rev War)

Stevenson - Reconstruction and Its Failure (Different motivations led to different actions, now had more economic/political reasons to oppose slavery)

Winthrop Jordan, " First Impressions: Initial English Confrontation with Africans" CA:

Due to various preconceptions, such as the belief that the color black meant evil and impure, when Englishmen first met Africans, they already treated them as inferior, believing that they were inherently more ugly and foul.

Connections:
