Their unconditional love and support enabled me to come this far in my education. Acknowledgements I have to thank so many. First of all, I bow my head in gratitude to Almighty Allah for blessing me the power, vision, proficiency and strength persistence with the capability to complete this endeavor and realize my thesis objectives. My most sincere acknowledgments are dedicated to my thesis supervisor, Engr. Col. (Retd. ) Fazal Ur Rehman Malik for his help throughout the preparation of this thesis, his ideas and comments regarding the structuring as well as the subject of my work were very helpful.

He constantly verified if I was on the right track and supported me in my strong wish to conduct this thesis. I would like to specially thank my family; my parents for supporting me to successfully complete my master's program; my brother and sisters for their continuous support along the way. My special gratitude to the employees of Azgard 9 for the time they devoted to answer all my questions. Special thanks to Mr. Rizwan (Department Manager of cutting ) and Mr. RiazChishte (Manager of stitching department) for being so cooperative in providing me the data required to conduct this thesis.

I want to thank my teachers and all the members of Institute of Quality and Technology Management for their help and cooperation throughout my master's program.
