

Reasons for ethical standards in the workplace

**ASSIGN
BUSTER**

Management often sets the tone for expected ethical behavior and actions in the workplace. The actions and behaviors of management, and other senior staff, help steer departments and employees toward proper and accepted business practices. Part of this responsibility includes enforcing rules, guidelines and policies fairly and equally across all levels of the organization. Managers may also be asked with helping employees navigate ethical dilemmas and solving difficult situations to keep the corporation on the right path. It's very difficult to define ethics In the workplace. Ethical" Involves conducting yourself in accordance with accepted principles of right and wrong. Ethics is a matter of using integrity-based decision-making procedures to gulled your decisions and actions. In the workplace, being ethical may Involve acting morally right, being honest, not cheating your employer, co-workers, or customers, not dealing from from the supply closet, and generally treating your co-workers well Other ethical situations may Involve harassment, Inappropriate use of the Internet, outside-of-work activities, etc.

If your workplace lacks ethical standards, your employer risks losing valuable employees and customers and possibly even more Federal laws Impose heavier penalties on employers Some of the primary forms of employee misconduct or unethical behavior Include the following: ; Misrepresenting time or hours worked; ; Lying to supervisors; Lying to co-workers, customers, vendors, or the public; ; Misuse of your employer's assets; and Lying on reports or falsifying records.

As you can see, there Is a widespread need for ethics In your workplace. A code of ethics can provide guldens for your Reasons for Ethical Standards in
