

Essay on research presentation

[Law](#), [Evidence](#)

The research on the social facilities highlighted several themes that are evident. These themes include social interaction, social class and gender. The theme of social human interaction is evidence in both gyms. As a general assumption a gym provides a very good space for social interaction. It is for this reason its significance is highlighted in the two research essay. From observing and notes, the theme on social interaction is influenced by different factors.

In one gym, social interaction is influenced by the need community to have a common way to peaceful society. In this case, the gym provides a common ground for people to interact regardless of their race or culture. It is also observed that the gym keeps the young people from social ills and crimes. Social class is very conspicuous in the two research presentations. In one gym, the setting of the gym is based in class where there is no much significance and class. In this particular setting no charges are required to indulge in the gym's social activities. In the other setting, the gym is based in very high social class. In this setting only the wells of in this particular society were able to access the comforts of the gym.

The theme on gender is highlighted in the same manner in both setting. In both social settings, the gym is associated with the masculine population. The activities in the gym are incredibly done by men. From footnotes and observation from the research presentations, it is evident that men were the majority population in the two gyms. The high class society gym however, has traces of female in its gym. This occurrence is attributed to the physicality in the activities in the gym.
