A Corrigendum on

Monitoring Cerebral Oxygenation in Neonates: An Update

by Dix LML, van Bel F, Lemmers PMA. *Front Pediatr* (2017) 5: 46. doi: 10.3389/fped. 2017. 00046

Cerebral Oxygenation and the Patent Ductus Arteriosus

The hemodynamically significant patent ductus arteriosus (PDA) remains a controversial topic. Clinicians and researchers are still debating whether or not it should be treated, what the best treatment strategy is and when would be the best time to intervene (48–51).

Reference 48–51 are:
