Environmental Pollution Studies. Publisher by LIVERPOOL UNIVERSITY PRESS VIDEOS: I believe in a world free of pollution and war. It may seem to be a far off dream of impossibility but I do think one day we can reach that goal.

We must join together on a united front and never back down. It's not only about us in the right here right now, but about our children, our children's children, and so on. I dream of a world of good and peace, a world where we fear not the air we breathe or the water we drink. We need not worry about the streets we travel down, or countries we'd like to visit. This world was a gift to us and I believe we need to take better care of this precious gem.
