There are animal rights protecting cats, dogs, dolphins, squirrels, zebras, pigs, birds, and other harmless animals. There are also animal rights protecting the violent and dangerous animals such as lions, tigers, and snakes. However, when it comes to LGBT and other social minorities, why do some people show no mercy or concern with them? What scope or kind of morality this anti-LGBT or anti-minority possesses? (Morrison, 113)

Introduction

This paper is an endeavor to explain the rights and freedoms of people around the world, as they (such freedoms) cut across the social classes and prejudices. The arguments of the paper are based on the presumption that the concepts of freedom and equality are sometimes being suppressed in some parts of the world including the Middle East, Russia, and Canada. Such

inequalities in the application of freedoms and rights is what makes it hard for the Middle Eastern and Russian people, for instance, to extend greater tolerance and share the same social privileges. That is why in this paper reviews on some incidents are observed to enlighten other minds and to discuss the standards and scope of morality.

The history of Idle no more

Nina Wilson, Sheelah Maclean. Jessica Gordon and Sylvia McAdam founded the Idle No More movement in the year 2010. The movement took a multidisciplinary approach to the fight against Bill C-45 and other bills that mutilated the environmental rights, especially those relating to the navigation limitations. The movement was accompanied by a series of teach-ins, protests, both peaceful and violent as well as rallies led by activists. The history of the movement has it that the creation of the movement was a response to the Bill C-45 which was brought forth by the Harper federal government. At the core of the activism of the movement stood the confederacy of the of Treaty number 6 First nations.

Further, on the account of the Idle No More Movement in Canada, the class minority or the aborigines are often denied or rejected of rights. Even if the law implements equality for aboriginal people in Canada, still some practice a discriminatory remarks against aborigines especially women. They also have the same rights and privileges to enjoy as citizen of Canada, and they play the very important part in building Canada as a nation. Like in the story Beloved by Morrison (25), the black people deserve their rights to live freely. As such, this research proposal suggests that there is a need of social and

global awareness protecting people in any color of the skin, sexual and gender preference, race, education, and any forms of discriminations.

The history of LGBT in Russia

Matters relating to Lesbian, Gays, Transsexuals and Bisexuals in Russia were highly influenced by the orthodox nature of the Russian religious topology. The political divisions also impacted on the affairs of the LGBT movement. Homosexual tendencies in Russia were discouraged by the governments for centuries (Herszenhorn 1). Perhaps the most notable efforts at killing homosexuality were the efforts of Tsar Peter the Great who banned homosexuality in the military in the year 1716. In the year 1832, the government came up with laws criminalizing homosexual tendencies. This was the same century a gay subculture rose in Russia. The laws criminalizing homosexuality banned in the year 1922. However, they were reinstated in the year 1932 by President Stalin. The year 1991 saw the European council push the Russian government to decriminalize the sexual acts associated with LGBT. Boris Yeltsin gave in to the demands of the European council. On Red Square in Moscow, Russia on July 14 this year, gay rights activists push their freedom by commenting on the “ Homophobia State Policy” signed by the Prime Minister Vladimir Putin. These gay rights activists continue to push their freedom in the society. In the following statements by Anton Maramygin to the Russian leader Vladimir Putin, it is clear that a number of people including the youth condemn LGBT group. The majority of Russian community disregards the “ new sexual sovereignty” and abandons the “ corrosive influence of Western decadence” (Guillory 2). That is why up

to this time social freedom and inequality are not yet felt and experienced by all people.

“ Our elders and atamans entrusted me to thank you for the course our country is on and for your policies,” Anton Maramygin, a Cossack youth, said to Vladimir Putin at the Seliger Youth Camp in early August. “ We see what you are doing: fighting against the sodomites and not allowing them to adopt our children. We support you in every way.” The crowd of young people applauded as Putin smirked (Guillory 1).

Russian’s abandonment of LGBT movement has started in 2006, and it has been pushing more debates on freedom. The Russian people who are afraid of homosexuals, according to research, protect their children and adhere to Christian morality. It is to note that the influence of religious tenets and dogmas embodies these Russian people to be blindsided of freedom (Morrison 84). In fact, the Russian president implements laws that prohibit the public appearance of LGBT and their form of airing their grievances and sentiments. The support of the government includes giving fines and sanctions for their LGBT members who violate the laws. That is why in this paper the central focus of the issue is to bring social freedom and equality based on human rights. Even if religion and other traditional people insist to abandon the existence of LGBT, how are freedom and equality realized?

The notable differences between the two groups

Clearly, the two movements are as different as they are similar. Notably, the most conspicuous difference is the fact that the LGBT movement fights for the rights of the lesbians, the Gays, the transsexuals and the Bisexuals in

Russia. On the contrary, the idle no more movement in Canada fights for the rights of the minority aborigines and the preservation of the environment. Secondly, the LGBT movement is centuries old (Morrison 121). On the contrary, the Idle No More movement has its roots on the decade between 2000 and 2010. The most noteworthy similarity is the actuality that they are in a fight against the government sponsored legal guidelines, which favor the sections of society considered to be the majority.

The objectives of these two groups

The methods of fighting to achieve the goals

The idle no more movement is characterized by demonstrations, protests and rallies. They as well are signatories of treaties that seek to make real their aims of freedom. On the contrary, the Russian LGBT uses legal arguments and protests as well as campaigns to get their stand heard. Still, both movements have been tremendously successful in attaining their goals. Even if they still face hitches, the movements have shaken the legal status quo and have forced the reserved government sponsored frameworks to pave way for transformation (Cooper 89).

The future of the movements' expectations

It is expected that in the end, the United Nations and other alliances will formulate a certain law promoting social freedom and equality (Davis 24). Morality is associated with one another, and they are forces to guide the people to behave and act accordingly. However, if morality dictates discrimination, injustice, and social bias due to narrow-mindedness and lack of tolerance, the human rights and the people must work together to

understand humanity. It is unfair that people give care and extra protection to animal rights even those violent, wild, and dangerous animals and that they can never give love and compassion among LGBTs, aborigines, and many minority groups.

These groups are harmless and useful in the society where they also exhibit potential for the growth of the region, country, and the world in general.

They exist, they live, and they need care and love. What kind of morality is it to abandon humanity? And what particular standard morality people should base their judgments and perspectives? (Morrison 112). To think, LGBTs and other minority groups are part in this world struggle, and they must not be rejected. They are not tigers or lions that seemed to be ferocious, and they are not terrorists who destroy and murder humanity. LGBT and other people are people who do not actually create a problem compared to other ferocious and dangerous criminals. They are here in this world harmlessly and peacefully to co-exist.

Conclusion

In conclusion, it is clear that the movements have not had a smooth sailing through the years. On the contrary, they have gone through a roller coaster ride. They have faced various legal restrictions and limitations such as the Russian laws criminalizing sexual acts associated with gay communities. The Canadian story is a little different because its history only dates to recent history. The Canadian story has as well faced the hurdles characteristic of such movements but has sufficiently attained its goals because the day it organized its protests and rallies coincided with such important days as the

Amnesty International Human Rights Day. To a remarkable extent, the two movements have made their voices heard. It is projected that with the rate at which globalism is taking root, and human rights becoming prioritized, the aims of the two movements will be entirely attained sooner or later.
