From the schedule above, I would not have early morning classes except for the Macroeconomic Theory 1 class on Thursdays. I chose these courses because of the timing of the classes, which makes my schedule flexible. My classes spread throughout the week with two classes daily except for Friday when I have only one class. Having one class on Friday gives me enough time to chill with friends and welcome the weekend. Moreover, my latest classes end at 5. 30 p. m. I do not have evening classes and I can spend my evening time playing soccer with friends. The tough decision I had to make on my schedule was taking ECO1102 D and ECO 2117 C. The two care consecutive classes and the venues are some distance apart. However, I

would overcome the distance issue by using my bike during that time.
