[Economics](#), [Trade](#)

This paper has mainly concentrated and focused on what remedies available under the convention of international of Sale of Goods (CISG). In short under this convention there are so many remedies available for aggrieved parts who seek remedies when the other party either intentionally or negligently breaches fundamental obligation of the contract. This question may happen to your mind that what is this CISG? This is Vienna convention; it is treaty between so many states that agreed themselves to form and to follow uniform international sales law¹ Perhaps, this convention took place since 1880 and until now it has ratified by 89 states that they had seen that this is proportion and practicable for world trade laws² According to world business man believing that this convention is one of successful convention for international uniform law in the world especially on the issues concerning international business. Unfortunately my country Tanzania is not a party of this convention of international Sale of Goods (CISG) but I think we are on the way to be among the contracting party list of this convention. This convention is very important and very successful hence it allow the parties to avoid choice of law issues because this convention accepted substantive rule of the contracting parties, accept courts and even arbitration unless otherwise excluded by the express terms and condition of the contract³ this means that the domestic law may be applicable in transaction of goods between parties from different contracting states. The Vienna convention as unified sales law in the world even though there are others convention related to sale of goods where by states contracted each other and obey on them but this convention is quite different, it success to help contracting nations being together by obeying rule and procedure of (CISG) regardless of their different

legal system. Nevertheless the drafter of this convention tried the best to make the convention freely from any interference to government, agency, institution, remedies, and concept or to any other particular legal system or doctrine.

Due to that situation it led to compromise to various approaches, traditions and doctrines. I insist that the whole world now knows that this convention has influenced the development of international trade with preservation of and ensuring the protection of trader interests during the breaching of their contract. 1 Joseph Lookofsky, 'Loose Ends and Contorts in International Sales: Problems in the Harmonization of Private Law Rules' (1991) 39 *American Journal of Comparative Law* 403. 2 Bruno Zeller, *CISG and the Unification of International Trade Law* (1st ed, 2007) 94. 3 See *International Commercial Terms (Incoterms)* in External Links.
