Socio-Economic Profile, Parañaque City 2009 BRIEF HISTORY OF PARAÑAQUE An Old Village By The Sea In 1572, Parañaque was said to be bounded by Ermita on the north and Cavite on the south. When the Spaniards came, Parañaque was already subdivided. It was so large that there was hardly no communication with the government. People immigrated from other places to settle here. Because their means of communication was so crude, these immigration disintegrated. They somehow put up their own government based on kinship and proclaimed their independence. The Spaniards founded the settlement of Parañaque in 1572, fifteen to two hundred forty-three years ahead of its neighbors. Commence with other Asian people, however, begun long before the colonizers came to this " Village by the Sea". Part of Parañaque was Cavite. Cavite was a " kakabit" or annex of the town. That is why it was called " Cabite" and later corruption of the word made it Cavite. Bacoor was used to be called bakod (wall) because of the wall that separated the town from the mother town. Zapote became independent because the people of the place cheated the people of Parañaque. Sapoti means to cheat. Las Piñas came from the word " pilas" meaning to tear-off, for they tore-off their land from Parañaque. Pasay used to be ricefields and the Parañaqueños planted rice. It has been called Pasay stemming from the word " palay". The pueblo also separated itself from the mother town. Parañaque salt beds. A popular source of livelihood for Parañaqueños. City Planning & Development Coordinator's Office 1 Socio-Economic Profile, Parañaque City 2009 As far as the legend of Ermita is concerned, it had been told that a priest who wanted to talk to God went to a vast plain not quite far from the pueblo

which became " bahay ng ermitanyo" since the priest became a hermit. From then on, the place was called Hermita and afterwards Ermita. Several years has passed, conditions changed and Ermita was cutoff from Parañaque. Some immigrants settled there while others settled in Pasay, established their own independence. The boundaries of Parañaque became definite. Parañaque was said to be known as " Palanyag" , which means embarkation. There was a story that at the mouth of Parañaque River was tall balete tree which looked like a sail boat, where the word Palanyag originated. ST. ANDREWS CHURCH- The evangelization of Parañaque started 400 years ago with the arrival of the Augustinian missionaries. The founding religious order chose La Huerta as the site of their mission house. It is now the shrine of the Nuestra Señora. Del Buen Suceso. 2 City Planning & Development Coordinator's Office Socio-Economic Profile, Parañaque City 2009 Another story has also been told about the Spaniards who came to the south and upon reaching his destination said, " para na aqui" to the rig driver of the calesa has was riding. But the rig driver did not understand him and presumed that the place as " Para-naaqui". So, everytime he goes to the south, he kept on calling the place Paranaaqui. Later on the place was named PARAÑAQUE and only later they found out that paranaaqui means only to " stop me here". On February 13, 1998, the City of Parañaque was declared and signed into law as a highly-urbanized city by President Fidel V. Ramos (R. A. 85-07) upon ratification of its creation for the purpose. To commemorate the said date, the city council approved an ordinance series of 1998 declaring February 13 of each and every year as the Foundation Day of the City of Parañaque. The Actual Origin The town was founded in 1572.

It lay proximate to the sea. Parañaqueños traded with the Chinese, Indonesian, Indian and Malay. People's means of livelihood was salt making, fishing, planting rice, shoe making and weaving. The government was composed of "cabezas de barangay". The principalia was the local aristocracy. It was a durable social institution. They were the political absorbers. They justified and moderated the demands of the Spaniards. In regard to education, they were offered only to the principalia class because they were the only ones who could only afford it. Because the shoreline of Parañaque was excellent for docking, it quickly become a barter center. While trade flourished, attracting people from other foreign lands, the Corsair Limahong attempted to sack the town of Parañaque. Whether for control or simply for plunder, his conquest failed. The failed attack in to the annal's of the country's history as the "Red Sea Incident"

San Antonio The Parañaque City Hall during Christmas Season A Landmark of Parañaque City located at Sucat Interchange City Planning & Development Coordinator's Office 9 Socio-Economic Profile, Parañaque City 2009 GEOGRAPHY Parañaque was the largest area in the whole province of Rizal. Shoreline. In older times, Parañaque's shoreline was accessible to barbers and bancas was only the means of transportation to merchants who bartered agricultural products to be sold at Parañaque market. Parañaque was truly a marketing center. Barter system was very popular in their lives during those years. Finished products such as clothing materials and wooden shoes came also through the shores of Parañaque. Boundaries. The boundaries of Parañaque were Taguig in the eastern side which became a pueblo on 1573, Makati in the northern end founded on 1670, Pasay in the northwest on 1727 and Pateros in the eastern part on 1815. CUSTOMS AND TRADITIONS Just as another town developed customs and traditions typical to their place, Parañaque also evolved customs and traditions are the following: 1. Sabong (Formal Cockfight) — usually there is a coliseum for this type of cockfight. 2. Pintakasi (Informal Cockfight) — means that a person request another to make their cocks meet. The cock

owners call for a cockfight. 3. Tupada — another kind of normal cockfighting. The fanatics of cockfighting meet at a small cockpit or arena for a exclusive fight for cocks. Oftentimes, coliseum is needed. If there is saber for each gladiator, a number of spectators and bettors, the game goes on.

CELEBRATIONS AND FESTIVITIES “ Caracol" is basically a festivity of boats. There is always a musical band at the end of every procession with hermano y hermana mayors in one of the boats waving and smiling to everyone.

CENACULO — PASION: FEAST OF THE RESURRECTION “ Pasion" is the chanting of the life of Jesus Christ, his birth, passion and death. “ Cenaculo" is the tradition brought by the Spaniards as a means of dramatizing the Christian Faith. The Cenaculo is being observed during lent. It is the enactment of Christ’s suffering and death. 10 City Planning & Development Coordinator’s Office Socio-Economic Profile, Parañaque City 2009 FLORES DE MAYO “ Santacruzán" is practiced by going around the whole town by a procession and praying the rosary commemorating the story about a queen who looked after the missing Holy Cross. There is always a family who is assigned to prepare food for everyone every time after its procession. Two to three days later, Flores de Mayo is held. “ Flores de Mayo" is a celebration of the discovery of Christ’s cross by Queen Elena, mother of ST. Constantine. The procession is after the litany. The lady participants usually the loveliest is the representative of Queen Elena (Sta. Elena) with her son, Constantine as escort. City Planning & Development Coordinator’s Office 11 Socio-Economic Profile, Parañaque City 2009 ORIGIN OF BARRIOS BACLARAN Baclaran is at the north end of Parañaque because its nearness by the seashore, the place was named after a fishing gear used by fishermen called

“ baklad”. Baklad is a rattan fence placed by fishermen around the fish siblings in order to protect them until they are readied for sale in the market. Many of these baklads were done right there at the seashore. So, people started calling the place “ Bakladan”, corruption of the word made it into the word “ BACLARAN”, hence its name came to be. TAMBO One of the original barrio in Parañaque was named after the TAMBO, a tall grass belonging to bamboo family. It is collected and tied to a long handle to produce a broom. Tambo grows abundantly in the place that anyone who needs a “ walis” may easily have one. From then on, the place has been called TAMBO. Local folks started building houses there and when it became densely populated not even a stalk of the tall grasses remain. LA HUERTA La Huerta is a Spanish word meaning “ orchard”, a place where young ladies and men spending time walking or strolling around. This place seemed like a lover’s lane. It is a garden thickened with fruits, flowers and trees which is a breath-taking sight. La Huerta used to have a very colorful and beautiful garden that even the friars, Spanish señoritos and señoritas enjoyed its ambience. People who lived as far as Batangas could not resist to stop and admire its beautiful sight. Unfortunately, since no one could maintain the garden, the orchard slowly died. Hence, at present, not a single trace of the garden can be found. STO. NIÑO Parañaque was divided into two (2) parts. The first part and the larger portion is connected to the mainland, hugging the shoreline of Manila Bay like an enormous sandbar. The second strip of land, east of the river is actually a smaller island surrounded by shallow marshes and swamps situated nearby which was then renamed after its patron saint, Santo Niño — the Holy Child Jesus. VITALEZ On the third day of April 1978, Barangay

Vitaleze was created under the Presidential Decree No. 1327. The following subdivisions known as Baltao, Airplane Village, Jetlane Village, Gat Mendoza and Vitalez were separated to form a distinct and independent barangay. 12

City Planning & Development Coordinator's Office Socio-Economic Profile, Parañaque City 2009

**SAN ISIDRO** Barangay San Isidro was created under Presidential Decree No. 1321 on April 3, 1978. The following subdivisions such as San Antonio Valley 2, 6, 12, 15, Clarmen Village, Salvador Estate, Lopez Village, Villa Mendoza and Parañaque Greenheights was separated and detached from Barangay San Dionisio to form and constitute a distinct and independent barangay known as Barangay San Isidro.

Planning & Development Coordinator's Office 15 Socio-Economic Profile,  
Parañaque City 2009 SOCIO-ECONOMIC PROFILE PHYSICAL PROFILE

Boundary: Parañaque City is bounded by Pasay City on the north,  
Muntinlupa on the southeast, Las Piñas on the southwest, Taguig in the  
northeast and Manila Bay on the west. Location: Parañaque is located at  
the geographical coordinates of 121°01" longitude (center) and 14°30"  
latitude (center). It is situated on the southern portion of Metro Manila,  
approximately 9.5 kilometers south of Rizal Monument. Land Area: The  
city's total land area is 46.57 square kilometers which is the third largest in  
the National Capital Region (NCR). It is subdivided into sixteen (16)  
barangays with two (2) districts. District I and II are composed of eight (8)  
barangays each district. The first district comprises Barangays Baclaran,  
Tambo, Don Galo, Sto. Niño, La Huerta, San Dionisio, Vitalez and San Isidro

while the second district consist of Barangays BF, San Antonio, Marcelo Green, Sun Valley, Don Bosco, Moonwalk, Merville and San Martin de Porres.

Topography: The city is relatively flat and situated along the coastline areas of six (6) barangays namely: Baclaran, Tambo, Don Galo, Sto. Niño, La Huerta and San Dionisio. The other barangays such as Moonwalk, Vitalez, San Isidro, BF, Don Bosco, Marcelo Green, Merville, Sun Valley, San Antonio, San Martin de Porres have an elevation ranging from 10 to 35 above water level.

Climate: Parañaque experiences the same climate weather condition with other cities in Metro Manila. Two distinct seasons: wet season from July to September and dry season for the rest of the year. The city enjoys an annual rainfall of 1. 822 mm and 34. 4 degrees Celsius temperature, a relative humidity of seventy six percent (76%) and a three (3) mile/sec. speed of southeast wind.

16 City Planning & Development Coordinator's Office Socio-Economic Profile, Parañaque City 2009

Soil Classification: The soil in Parañaque is classified under Guadalupe soil. It is a volcanic eject that produces a loam to clay loam texture that can hold more water. The soil contains more clay than silt. Its permeability is low with high swelling capacity.

Land Use: As of this calendar year 2008, the following are the land uses in Parañaque City.

Land Use	Residential 1	Residential 2	Residential 3	Residential 4	Commercial 1	Commercial 2	Commercial 3	Industrial 1	Industrial 2	Institutional	Parks & Playground	Cemetery	Utilities	Creeks & Rivers	PUD Area	Square Meter

Zoning: The City of Parañaque, through the Sangguniang Bayan, then passed the Ordinance No. 07-027 series of 2007, more commonly known as the Comprehensive Land Use Plan and Zoning of Parañaque. It has adapted this legal tool in implementing its land use goals and objectives in its all-out support to develop the city. Under the Section 19 of the Zoning Ordinance 07-027, all land development and building

constructions/renovations/alterations of residential, commercial and industrial structures are required to secure the necessary zoning/location clearance prior to the implementation of the project. The ordinance will guide, control, regulate the future growth and development of Parañaque City while protecting public health, safety, peace, comfort and convenience of its constituents. Developments: Commercial and Industrial Development

Barangay Baclaran remains the principal central business district while the corridors of Ninoy Aquino Avenue and Dr. A. Santos (formerly Sucat Rd.) are the sites of the fast growing business and commercial activities like motor shops and fine dining restaurants. There is also an emergence of banking and financial rows along Barangays BF, Don Bosco, San Isidro, San Antonio and Moonwalk. Light industries are concentrated along the South

Superhighway beginning Barangays Sun Valley, Merville and San Martin de Porres. d Bay City Development Project Part of the Public's Estates Authority (PEA) integrated framework plan in the development of the 1, 500 hectares

reclamation area known as Bay City Development Project. The project stretches from Roxas Boulevard in Manila from the Cultural Center of the Philippines (CCP) all the way to the Coastal Road, Las Piñas section covering four cities and a municipality. These are the cities of Manila, Pasay, Parañaque, Las Piñas and Municipality of Bacoor. The project aims to create a new skyline for the Metropolis and develop the Manila Bay waterfront to international standards. There are seven (7) components of the program using the "development by island" approach. The components are Mixed Use Development, Green Zone and Sea Front Promenade, Integrated Movement Networks, Adequate Waterways and Efficient Drainage System, Phased Development, District Urban Design and Efficient Environmental Management. The Asia World City Barangay Don Galo and Tambo are hosts to the 200 hectares Asia World City. This is considered to be the largest Island Development project in the country. Its sixteen (16) multi-storey structure (30-storey high) forms the centerpiece of the urban center development. 18 City Planning & Development Coordinator's Office Socio-Economic Profile, Parañaque City 2009 The 183 Marina Properties is divided into four sections: the low density residential areas of Marina East, and South, mixed use high density residential/commercial area and low rise townhouse development. It is conceived as a prime residential subdivision complete with a neighborhood shopping center, pocket parks, recreational center, schools, 5-star hotel and a financial district. New Central Business District of Parañaque Local and foreign consortiums together with the Public Reclamation Authority (PRA) will spearhead the large-scale development period and transform a 204-hectare area into an institutional

trading center envisioned as the New Central Business District of Parañaque. Moreover, a 43 hectare property will also be developed into a tourist oriented business neighborhood using international standards.

**DEMOGRAPHIC PROFILE Population Structure** The projected population of Parañaque for the year 2008 is 568, 908 with 118, 960 households. This constitute about 4. 78% of the total population of the National Capital Region (NCR) and 0. 62% of Philippine population. **Population Growth Rate and**

22 City Planning & Development Coordinator's Office Socio-Economic Profile, Parañaque City 2009 SOCIAL SERVICES PROFILE Health Profile 1. 1 Health Services The city's health situation in the last two (2) years can be highly

evaluated as outstanding for being the recipient of Healthy City by the Alliance of Healthy Cities of Western Pacific Region. A healthy city is a process of improving the health of city dwellers through improved living condition and better health services with various urban development activities through the partnership of public, private and voluntary sectors.

Trend of Vital Health Indices ParaÑ±aque City, 2008 Health Indices Crude Birth Rate (CBR) Crude Death Rate (CDR) Maternal Mortality Rate (MMR) Infant Mortality Rate (IMR) Sources: City Health Office, ParaÑ±aque City

Year	CBR	CDR	MMR	IMR
2001	14.47	5.47	0.32	28.60
2002	21.27	5.36	1.92	25.80
2004	16.33	6.63	0.22	12.70
2005	12.31	3.48	0.29	19.90
2006	14.02	4.48	0.13	19.10
2007	12.80	3.91	1.24	18.56

1. 2 Births The crude birth rate is a measure of the increase of population through birth statistics of birth population and registered in the Office of the Civil Registrar. In 2007, the city had recorded 7,382 live births by a crude birth rate of 12.80 per thousand live births. This figure is slightly smaller than the previous year, which is 14.02 per one thousand. Of these live births, 3,889 (52%) were male while 3,492 (47%) were female. In 2007, mostly (81%) of deliveries were attended by trained/skilled health personnel. Of which, 43% were doctors. Biggest proportion (47%) of deliveries were done at home. Fifty-three (53%) of deliveries in 2007 were either done in government/private hospitals or clinics.

1. 3 Morbidity Majority of the leading causes of morbidity were still communicable. The leading causes of morbidity were Upper Respiratory, Infection, Bronchitis, Wound, Diarrhea, Hypertension, Parasitism, Acute Tonsillopharyngitis, Pneumonia, UTI and TB Respiratory.

City Planning & Development Coordinator's Office 23 Socio-Economic Profile, ParaÑ±aque

City 2009

1. 4 Mortality There were 2, 289 deaths from all causes in 2007 with a crude death rate of 3. 91 per 1, 000 population. This was 13% lower compared to the average rate for the past five years. Highest CDR was reported in Barangay Don Galo with 4. 86 and followed by Barangay San Dionisio and San Isidro with 4. 77 and 4. 36 respectively. In 2007, biggest proportion (24%) of deaths were due to coronary artery disease followed by hypertension (13%) and pneumonia (10%). Six percent of the total deaths belong to age group 0 to 1 year. Of which, 61 percent were males and 39 percent were females.

1. 5 Health Resources Health Facilities The Parañaque City Health Office delivers its health services through promotion protection, preservation and restoration of health of the people in 16 health and 3 barangay station. On the other hand, the curative aspect is taken cared of by six (6) private and one (1) government hospital. List of Barangay Health Centers City of Parañaque Year 2008

Manpower: The total social health manpower compliment was 346 permanent, casual and job order personnel. This comprises the following: 21 Medical Officer, 23 Dentists, 11 Medical Technologists, 119 Nurses, 9 Nutritionist-Dietician, 17 Nursing Attendants, 34 Barangay Aides, 10 Dental Aides, 12 Sanitary Inspectors, and

31 Administrative Support Staff. Health Budget: The City Health Office has a total budget of Php 119, 357, 833. 17 in the current year 2008. Which is 5.

24% of the total city budget. Of this office budget, 76. 62% or Php 91, 451, 833. 00 was spent for personnel services of its employees. About 17. 10% or 20, 406, 000. 00 was utilized for maintenance and operating expenses. The whole 6. 28% or Php 7, 500, 000. 00 for capital outlay. City Planning &

Development Coordinator's Office 25 Socio-Economic Profile, Parañaque City 2009 Nutrition Being underweight, even mild increases the risk of death and inhibits cognitive development in children. Thus leading to less fit and productive adults. Moreover it perpetuates the problem from one generation to the next through malnourished women having low birth weight babies. o

In 2005, Parañaque City ranks 15 among cities with low prevalence rate of malnutrition. o Slight increase in OPT coverage, 91. 10% to 91. 52% makes

the city find more underweight children. o Among the 16 barangays in Parañaque, Barangays Sto. Niño and Don Galo have the highest prevalence of undernutrition with 8.94% and 6.42% respectively. Barangay Vitalez with the smallest population size ranked third — 6.28% among the 16 barangays with high prevalence rate of malnutrition. o However, Barangay San Isidro, the second largest population in the city with estimated PS of 11,790 registered the lowest prevalence rate with only 2.07%.

FLORENCIO V. BERNABE, SR. MEMORIAL HOSPITAL (PARAÑAQUE COMMUNITY HOSPITAL) The lone government hospital in Parañaque is 50-bed capacity located at Quirino, Avenue, La Huerta, Parañaque City. The hospital building was the former municipal hall converted into a government general hospital. The hospital is in secondary status has the following manpower components. Regular Personnel Medical Specialist Non-Itemized (Casuals) Job Order Detailed Housekeeping Staff Detailed CSU Personnel 136 14 28 8 4 10 Its medical services is centered on the health need requirements of its constituents especially those in the depressed areas who are mostly indigents, medical services offered are surgical operators, obstetrical-gyne cases, pediatric cases, pathological (lab) procedures including blood chemistry, radiological (x-ray) procedures, dermatological services, internal medicines, emergency cases/all kinds except those requiring special procedures and medico legal cases with complications, out-patient cases (elective or primary health care) and social welfare services (card holder and senior citizens). 26 City Planning & Development Coordinator's Office Socio-Economic Profile, Parañaque City 2009 EDUCATION PROFILE There are one hundred and eight (108) Day Care

Centers in sixteen (16) barangays of Parañaque with one hundred and thirty three (133) Day Care Workers. The City government supports eighty-four (84) Day Care Teachers; and forty three (43) Day Care Workers are funded by the barangays. Informal Settlers There are approximately two hundred twenty seven (227) areas occupying the City of Parañaque, which are considered Urban Mission Areas. Four (4) areas are considered Areas for Priority Development (APD) and fourteen (14) others are undergoing Community Mortgage Program (CMP). Barangay Sto. Niño has the most number of informal settlers, thirty five (35) followed by Barangay San Antonio with twenty five (25), Barangay San Dionisio with twenty two (22) and Barangay Sun Valley with twenty (20) clustered settlements. Household population in each

settlement ranges from 50 to 1, 700 families. The city is home to 25, 073 informal settler families, covering an estimated land area of 45. 131 hectares. Majority of informal settler dwellings are made of light materials; only a few are made of concrete and semi-concrete materials. Monthly income of these informal settler families falls below the minimum wage. Pipelined Housing Projects of the City Government City Government plans to acquire the following properties under the direct selling scheme for on-site and settlement purposes. 1. Sto. Townhouse City Planning & Development Coordinator's Office 47 Socio-  
Economic Profile, Parañaque City 2009 SOLID WASTE MANAGEMENT  
CONDITIONS (CALCULATIONS & ASSUMPTIONS) In the absence of specific

data on waste generation of areas like townhouses, compounds, apartments, blighted areas, etc., the total daily waste generation was computed based on the factor 0.6 kg. per person per day as set by the Japanese International Cooperation Agency (JICA) Study. The waste generation per person per day is illustrated as follows:

Year	Waste Generation (kg/person/day)
2000	0.562
2001	0.573
2002	0.585
2003	0.596
2004	0.597
2005	0.600
2006	0.600
2007	0.600
2008	0.600
2009	0.600

The average per capita waste generation rate for Metro Manila (0.6 kg./person per day) is estimated from the results of the Metro Manila Solid Waste Management Master Plan, funded by JICA, in 1999. The total generation rate estimate is therefore calculated by multiplying estimated population 585,644 (CY 2009)) by the estimated average per capita waste generation rate (0.6 kg/person per day) equating to approximately 351 tons, thus;  $585,644 \times 0.6 = 351,386.4 \text{ kg} / 1,000 = 351.39 \text{ tons}$  Considering that one household comprises an average of five persons, it is estimated that a family generates 3 kg of waste per day. 48 City Planning & Development Coordinator's Office
