These special opportunities make the residents able to spend time joyfully and productively. Activities like painting and other arts and crafts activities are a good way to spend leisure time with fun. Yoga and exercise keeps the residents fit. Recreational activities allow the residents to interact socially and they feel better psychologically (Local Golden Living Centers, 2015).

## **What technological issues or challenges are present at the facility?**

The role of technology in health providing homes has become very important because the service providers are required to serve up to older people. At Golden Living Community –independent Chateau technology is being deployed in skilled nursing facilities and other living facilities to improve the standards of services provided to service users. For better examination the facility should adopt the latest innovation in health technology that is electronic patient monitoring. The facility is working on it while having some challenges regarding the communication between pharmacy, facility and

doctors or physicians. It is also facing some issues in the nursing assistant documentation that was a paper based work in the past. Golden Living has developed its own custom apps and it is having some problems while shifting to a new integrated off the shelf applications.

## **How do you anticipate health care reform will affect the health care facility?**

Health care reform is encouraged to give an access to quality health services for all the people of the country. The Golden Living Community -independent Chateau has to develop a proper implementation plan for health reform to build up solutions. It has to take proper actions to make certain the successful implementation of the reforms of health. The health promoting impact of basic health care reform on the health care facility will be drastic because people have more awareness about health care facilities provided by the state. Payment changes will affect the health care facility can show a humble move in the way for paying for value as compared to the quantity or volume of the services provided to service users. The costs would be required to be reduced because of the reduction in the payments at the facility .
