

Swot analysis term paper examples

[Profession](#), [Student](#)

Philadelphia School Board

Strength

Adequate textbooks and learning resources

Adequate students'

Presence of qualified teaching staff

Qualified non-teaching staff

Weakness

Inadequate finances in funding major projects

Opportunities

Disciplined and determined students

Committed and ambitious staff

Committed Board of School

Good legislations in education

Threats

Low political will power

Competition from neighbouring schools

High prices of food

Poor climate

Describe how the school board could benefit from using a S. W. O. T analysis as part of a strategic financial plan

In any institution, a SWOT analysis remains as a very important tool. SWOT analysis usually analyses a given institutions, Strengths, Weakness, Opportunities and Threats (Mulembo, 2009). The school board is usually in charge of making final decisions in regard to the management of a given institution (Anja, 2010). Hence in the process of financial planning, in having

a SWOT analysis, the given board of the school might be able to identify some of the internal environment strengths and weakness it possesses. In knowing their weakness, they can be able to institute changes in order to eliminate or minimize them (Anja, 2010). Strengths usually provide an added advantage to the given school in terms of identifying its positive strengths in its internal environment (Mulembo, 2009). SWOT analysis is often used for financial planning by the board of a school as it also provides a better analysis of what to expect in regard to their external environment. They are able to use the information to audit, analyse, plan, and make important decisions that affect the running of the school (Anja, 2010). In summary, SWOT analysis can be used by the board of that school in ensuring they make a sound decision in regard to the management of that given school by proper financial planning (Anja, 2010).
