Professional development opportunities

The website listed above focuses on the ethics and responsibilities that aviation professionals have in their daily work. It is mainly geared towards those teaching aviation, however, the information contained on the site is helpful for anyone in the field. This site focuses on all aspects of aviation work, not just pilots, so it is relevant to all who work in the aviation industry. The SAFE organization, Society of Aviation and Flight Educators, offers a variety of useful information on their site. You can read current aviation news, learn about professional development opportunities, purchase liability insurance, read the organization's meeting minutes, learn their code of ethics and even learn about mentoring opportunities. The website also gives information on available scholarships for many different areas of education. On the website, you can also sign up to have their email newsletter sent to you. Their newsletter will keep you up to date on current initiatives within the aviation industry and will keep you posted on how you can get involved if you so choose.

I believe this site, is a high quality resource for many different areas, but the main focus is on professionalism, ethical behavior and professional development. This is an active group, so this website is continually updated, making it a good resource to return to as opposed to just reading one time. This organization does encourage you to become a member of SAFE. If you do, then you get discounts and access to a member's only section of the website. However, even without being a member, there is a multitude of pertinent information on their website and the site does not go overboard in terms of pushing their memberships.
