

Forensic biology and chemistry - resume cv example

[Science](#), [Biology](#)

Forensic Biology and Chemistry

Resume Profile I have a profound background on biology and chemistry as I major in forensic biology and minor in chemistry. Career Objective To apply my background in forensic biology and chemistry to access employment in a science field that will promote and enhance my laboratory skills, computer skills, and organizational skills.

Experience

I have profound experience in General Biology where I undertook laboratory reports, poster sessions, and various research projects. I also have experience in Genetics chemistry and Cell biology. Additionally, I have experience in the Biology of Microorganisms where I identified unknown bacteria.

Skills

Laboratory and equipment Skills

I have relevant skills to operate computerized scanners, microscopes, PH meter, sample freezers, and machines that carryout chemical studies. I have skills to carryout Column Chromatography, Plasmid DNA isolation and purification, bright Field Microscopy, and Staining and Culture of Microorganisms. I also possess laboratory safety skills and protective techniques.

Research Skills

I have substantial skills that enable me to perform Online and print research that manifest in academic scientific publications and medical journals. I also have wide knowledge on the findings of other researchers that reference their studies on Genetics chemistry and Cell biology.

Analytical Skills

I have strong analytical skills to interpret my test results and the findings of other researchers. I am also familiar with the DNA analytical tools, DNA sequencing, DNA extraction, and all statistics that relate to Genetic studies. I have the skills that enable me to carry out long-term observations in my research projects.

Computer Skills

I have relevant skills to record the results and operate the gene imaging software. More so, I am familiar with fundamental computer packages that include MS Word, Adobe Illustrator, PowerPoint, and Excel, which were significant in the presentation of my research results.

Organizational Skills and Communication Skills

I have strong organizational skills and commendable interpersonal communication skills. I also have the ability to interact with others both orally and in writing. Moreover, I can work independently and as part of a research team.

Teaching

I have been preparing equipment and supplies for lab instruction. I also assist fellow students in addressing various laboratory queries. I have been a Teaching Assistant for Cell Biology Lab and Genetics Laboratory for about six months.

Activities, Organizations, and Community Service

I am an active member in our local church activities.

I have been a volunteer in our local clinic during my holidays.
