Distortion in Memory for Emotions: The Contributions of Personality and Post-Event Knowledge

Memory Distortion, Emotional Bias

Distortion in Memory for Emotions

Duration or intensity of their emotional responses is an important factor of identification however the article does not cover this aspect of investigation.

(N = 189)

Co-relational Design

Correlation method is used in the research.

revision of memory for prior emotions can occur immediately, with an introduction to the post event information

Olivier Corneille, Johanne Huart and Emilie Becquart, Serge Bre´dart

When Memory Shifts Toward More Typical Category Exemplars: Accentuation Effects in the Recollection of Ethnically Ambiguous Faces

Category based distortions, Naive Theories, Face identification

This document highlighted the memory distortions specifically for face recognitions. It also discusses the practical applications of the results.

Does not cover the distortions during suspect recognition in police investigations and similar scenarios.

(N = 96)

Random Trials and Analysis of variation (ANOVA)

Analysis of variation (ANOVA)

Linda A. Henkel, Kimberley J. Coffman

Memory Distortions in Coerced False Confessions: A Source Monitoring Framework Analysis

Memory Distortions, False Confessions, Source Monitoring

Effective understanding of Memory Distortions in Coerced False Confessions in police interrogations

Not Applicable

Descriptive Qualitative Study

Not Used

Techniques for effective interviews in memory distortion cases

Saul M. Kassin, Sara C. Appleby and Jennifer Torkildson Perillo

social anxiety, social phobia, memory, interpretation

Identification and understanding of Biases in Interpretation and Memory reflections

Generalized Social Phobia taken into account specially for the study and critical perspectives not analyzed

(n= 200)

Quantitative Analysis

Test of Significance

Results illustrate the importance of examining the nature of source monitoring errors in investigations of memory biases in social anxiety.

Faith Brozovich, Jutta Joormann, and Ian H. Gotlib

The unified theory of repression
