Thanks to our friends at , we've rounded up some can't-miss deals. Check it out:

Happy National Coffee Day! Amazon has an excellent discount on a very high-end espresso and coffee maker. We've used a lower-end model and they make truly great coffee. It has an integrated professional quality burr grinder to use a fresh grind for each brew and it will consistently make excellent coffee at the perfect temperature each time. You can program this machine to remember your settings once you find your perfect cup. \$500 is a great price for a high-quality automatic coffee and espresso maker and can easily save you money compared to going to Starbucks.

This is PCMag's Editor's Choice for its solid build quality, strong battery life and overall bang for your buck performance. It has a sharp display and this configuration has a powerful i5 processor that is more than enough for any office work. At its price this is a steal, especially with a Windows Pro license included which is perfect for any small business.

If you haven't bought an Amazon Gift Card yet then today is your chance to get one and receive a bonus \$10 Amazon credit when you do. This is one of the best deals you can get from Amazon since for many people it's like cash in the bank if you shop a lot at Amazon as we do. Eligible users will be prompted with instructions on how to redeem this offer.

This body scale not only lets you monitor and track your weight through your smartphone, it can also measure your cardiovascular health with Pulse Wave Velocity measurements to track how fast blood is moving through your body. It can also measure and track your full body composition based on fat, muscle, bone and water so you can visually see if your training is increasing your muscle mass and burning off the fat.
