

Since me bag 94% in
mathematics in high

[Business](#), [Industries](#)

Since I was a kid, I was always inquisitive in nature about my surrounding gadgets ranging from console video games, remote controlled car to a mobile phone. I also was very fond of numbers which helped me bag 94% in Mathematics in high school. My zeal for mathematics and electronics helped me opt Engineering with Electronics & Telecommunication as my undergraduate majors.

I chose to contribute towards Robotics workshops organized in the college and was later on made responsible to organize 'SOLDER-ON-WAR' – a key event in Robotics for inter-engineering students. Post-graduation, I sought to gain practical experience of the latest technologies used worldwide hence I underwent Cisco Certified Network Associate (CCNA) training. Seeing my thrust towards electronics field, I was hired by Sungard Availability Services as an Associate Engineer in Networking. In Sungard, I endured much training and was responsible for custom IT services across enterprise cloud, cloud recovery, disaster recovery, and application management. I was acquainted to risk management & gained expertise in operating different networking devices & technologies as required by the customers' individual proclivities with simultaneously developing communication skills. My hard work and consistency led my promotion as an engineer. My future career objective is to become a financial analyst who analyzes financial statements and develop a deep understanding of Finance. I chose Finance because this sector is everlasting and is ought to grow with the booming economies of the world.

I wish to witness this growth by being a part of the system and grow with it. I hope to gain practical experience in areas such as investment analysis,
