

Global smartphone power management ic market

[Business](#), [Management](#)

Power management ICs are used to manage power requirements and to support voltage scaling and power delivery sequencing in power electronic devices. They are the key components in any electronic device with a power supply, battery, or power cord and they optimize power usage. They are used in electronic systems such as cell phones, TV's, and computers and in power-saving technologies such as smart meters and grids.

The power management ICs that are used in smartness are offered to as smartened power management ICs. Covered in this Report This report covers the present scenario and the growth prospects of the Global Smartened Power Management IC market for the period 2014-2018. To calculate the market size, the report considers revenue generated from sales of power management ICs for smartness worldwide.

The report does not consider the following in calculating the market size:
Components or devices used in the production of smartened power management ICs
Any types of devices that do not fall under the smartened power management IC category
Service and maintenance of smartened power management ICs

Key Regions MEME OPAC Americas
Key Vendors Maxim Integrated Products Inc. Glaucoma Inc. Satisfactoriness NV Texas Instruments Inc. T') Other Prominent Vendors Dialog Semiconductor Freestyle Semiconductor Fajitas Semiconductor RichterTechnology
Key Market Driver Rapid Adoption of Smartness For a full, detailed list, view our report.
Key Market Challenge Increase in Design Complexity
Key Market Trend Emergence of Miniaturized Semiconductor Devices
Key Questions Answered in this Report What will the market size be in 2018 and what will the growth rate be?
