

Mis 2223 exam 1

**ASSIGN
BUSTER**

You usually need to install web apps before you can run them. False

If your friend is playing a game on a computer, on what type of device would he see a big explosion within the game? Output

Which of the following is a collection of computers and devices connected together, as shown in the accompanying figure, often wirelessly, via communications devices and transmission media? network

Which of the following gestures would you use if you want to activate a link on your new tablet? tap

Which of the following is NOT an operating system used by today's computers and mobile devices? DOS

In which of the following mouse operations do you quickly press and release the left mouse button twice without moving the mouse? double-click

In which gesture do you move two fingers apart? Stretch

If you are looking for an online social network that allows you to stay current with the daily activities of those you are following, which of the following is the best match for you? Twitter

The term web app is an application stored on a web server. True

The Internet is a worldwide network. What is the World Wide Web? It is a service on the Internet

Some websites support streaming, where you access the media content as it downloads. True

Your smartphone allows you to take and store photos, and play and view your digital media. What is this overlap of technologies called? Convergence

In which gesture do you press and hold one finger on an object and then move the finger to the new location? slide

Which kind of desktop uses the same case to house the screen and processing circuitry? all-in-one

In a networked environment, each computer on the network can access the hardware on the network. True

Who is Microsoft's founder? Bill Gates

All social networking sites have a specialized audience. False

When a person buys something from an app store, the cost of the item is charged to a credit card whose number often is known by the app store. On what type of device is the credit card number kept by the app store? Storage

If your cousin asks you what devices can be used to record and retrieve data, instructions, and/or information for future use on a computer, which of the following would you tell her? USB flash drives, SSDs, hard disks

Which of the following is a collection of unprocessed items, which can include text, numbers, images, audio, and video? Data

Larger corporate, government, and Internet applications may use powerful, expensive servers (an example of which is shown in the accompanying figure) to support their daily operation. True

On a typical notebook computer, the monitor is on top of the system unit, and the keyboard attaches to the system unit with hinges. False

What is a type of personal computer designed so all of its components fit entirely on or under a desk or table? desktop computer

Which of the following mouse operations would you use if you want to display a shortcut menu? right-click

The application system provides a means for users to communicate with the computer or mobile device and other software. False

Examples of mobile users include engineers, scientists, architects, desktop publishers, and graphic artists. False

Examples of operating systems include those that allow you to send and receive e-mail messages, prepare your taxes, organize digital photos, and play games. False

Green computing involves reducing electricity consumed and environmental waste generated when using a computer. Which of the following is a valid strategy for supporting green computing? Buy a computer from a retailer who will dispose of your old computer properly.

You do not want to store your data locally on a hard disk. You would rather store it using an Internet service. What is this kind of storage known as? cloud storage

Most e-book readers are usually smaller than smartphones. False

Which of the following terms is an alternate term for the kind of computer shown in the accompanying figure? (apple laptop shown) notebook computer

While distance learning classes are popular, you cannot obtain a degree from them. False

Which of the following is an electronic device, operating under the control of instructions stored on its own memory, that can accept data, process the data according to specified rules, produce results, and store the results for future use? computer

One effective strategy for creating strong passwords includes changing common words to symbols. False

Cellular radio uses the cellular network to enable high-speed Internet connections to devices with built-in compatible technology, such as smartphones. True

What involves reducing the electricity consumed and environmental waste generated when using a computer? Green computing

Which of the following is a personal computer that users can carry from place to place? mobile computer

Research indicates that the more text messages students send, the more easily they find formal writing. False

Which of the following is an example of information on a grade report? grade point average

Which of the following category of users works on a computer while away from a main office, home office, or school? mobile

Which of the following is a category of users? enterprise users

Which of the following gestures would you use if you want to move an item around the screen on your new tablet? slide

Which kind of user requires the capabilities of a powerful computer? power

Digital cameras often can connect to or communicate wirelessly with a computer, a printer, or the InternetTrue

Storage devices like the hard disk shown in the accompanying figure often function as a source of input because they transfer item from storage to memory. True

A blog is an informal website consisting of time-stamped articles in a diary or journal format, usually listed in reverse chronological order. True

With online investing, the transaction fee for each trade usually is much more than when trading through a broker. False

You want to interact with a touch screen. Which of the following do you use? gestures

Which of the following is NOT a type of message you can send with a smartphone? media message

Which of the following mouse operations would you use if you want to start a program feature? double-click

Which of the following is true about a computer? Its electronic components process data using instructions

Which of the following is an example of data on a grade report? course names

If you were required to give a speech identifying the risks of using computers and digital devices, which group of items would you include? Health risks, privacy risks, environmental risks

Which of the following is NOT a reason that consumers purchase separate stand-alone devices? They are practitioners of online integration

Which kind of device is hardware capable of transferring items from computers and devices to transmission media and vice versa? communications device

Most examples of the kind of computer shown in the accompanying figure can operate solely on batteries. (Apple laptop shown)False

Which of the following is the term for known specific patterns of viruses? virus signatures

Which of the following is NOT a popular programming language? Chrome

How do you determine which type of computer- tablet, laptop, or desktop- is best? It depends on your needs

How often should you change your password? every three months

Which of the following enables users to speak to other users over the Internet? VoIP

If you are looking for a keyboard to project from a device to a flat surface, which of the following would you use? virtual keyboard

In many networks, one or more computers act as a server. True

Enterprise users use spreadsheet, database, and accounting software. True

Which of the following mouse operations would you use if you want to deselect an item on the screen? click

As wikis have grown in number, size, and popularity, many educators and librarians have shunned the sites as valid sources of research. True

Which of the following is an electronic version of a printed book, readable on computers and other digital devices? e-book

Which gesture displays a shortcut menu? press and hold

If someone feels distressed when deprived of computers and mobile devices, that person is said to suffer from what condition? Technology overload

Collections, such as that pictured in the accompanying figure, allow computers to share which of the following? (picture shown: computers/printers/etc. connected to something in the middle)resources

Which of the following is a specification that enables web content to be distributed to subscribers? RSS

Which of the following gestures would you use if you want to run a new browser app on your new tablet? double-tap

A password is a unique combination of characters, such as letters of the alphabet or numbers, that identifies one specific user. False

On which of the following pointing devices can you control the pointer by sliding your fingertip? touchpad

Which of the following gestures would you use if you want to scroll on your new tablet? swipe

Which of the following is not one of the reasons that a mobile device can be categorized as a computer? It can accept output

To promote education by computer, vendors often offer substantial student discounts on hardware and software. True

What makes the posts on Twitter considered a blog? Their journal format

If a manufacturer is looking for memory that is very durable and shock resistant, which type of technology might it use in its laptops? SSDs

You need extensive knowledge of networks to set up a home network. False

The Internet is a service of the web. False

Most memory keeps data and instructions permanently. False

Which of the following gestures would you use if you want to get immediate access to allowable actions on your new tablet? press and hold

The term drive app is used to describe applications stored on a computer.

False

Which of the following conveys meaning and is useful to users? Information

Which of the following mouse operations would you use if you want to change the position of the pointer on the screen? point

A leading maker of security software has made a claim that its software blocked a given number of malware attacks in a single year. From your knowledge of malware, which of the following is the likeliest number from that claim? 5 billion

Which of the following entails having the knowledge and understanding of computers, mobile devices, the Internet, and related technologies? digital literacy

Which of the following is NOT a strategy that supports green computing? creating web apps instead of desktop apps

Which of the following works in a manner similar to a copy machine? scanner

Which of the following kinds of software is NOT usually included by an installed operating system? spreadsheet

Batteries in the kind of computer shown in the accompanying figure typically last longer than those in tablets. False

In which gesture do you press and hold one finger and then move the finger horizontally or vertically on the screen? swipe

If you are looking for an online social network that allows you to include recommendations from people who know you professionally, which of the following is the best match for you? LinkedIn

Each employee or customer who uses a computer in a large business is which kind of user? enterprise

In which gesture do you quickly touch and release one finger one time? tap

Wireless Internet access points enable users with computers and mobile devices to connect to the Internet wirelessly. True

You should delete or quarantine flagged attachments immediately. True

Which term is used to illustrate the gap between those with and those without access to technology? digital divide

Which of the following gestures would you use if you want to activate a mode that enables you to move an item with one finger to a new location on your new tablet? press and hold

A hot spot is a wireless network that provides Internet connections to mobile computers and devices. True

For which of the following is the spelling, disk, used? magnetic media

Breakthroughs in surgery, medicine, and treatments seldom result from scientists' use of computers. False

Which of the following is NOT an example of malware? vaporware

In which gesture do you move two fingers together? pinch

The major differences between server computers like the one in the accompanying figure and client computers are that the client typically has more power, more storage space, and expanded communications capabilities. False

Most computers and many mobile devices, such as smartphones and portable media players, can connect to which kind of network? Wi-Fi

USB flash drives and memory cards usually hold more than hard disks like the kind shown in the accompanying figure. False

What is the definition of a website? a collection of related webpages

Nearly every life event is stored on a computer somewhere. True

Providers of wireless communications services may charge additional fees for sending text, picture, or video messages, depending on the service plan.
True

Which of the following consists of electronic components that store instructions waiting to be executed and data needed by those instructions?
Memory

With which of the following can you have a real-time typed conversation with another connected user? IM

Why do many webpages use graphical designs and images? to convey messages

Like an IP address, the components of a domain name are separated by commas. False

What is the role of the W3C? oversee research and set standards for many areas of the internet

Which of the following identify the five steps in web publishing? plan the website; design the website; create the website; host the website; maintain the website

What is the term for characters, such as ??? or :(, used to express emotion in an email message or newsgroup article? emoticons

JPEG is a format that expands graphics to increase their file size, which means the file takes up less storage space. False

If your cousin wanted to view information from the World Wide Web, what application software would you tell her to be sure she has on her computer? browser

When a radio station broadcasts a live sporting event over the Web, what technology are they using? streaming

Which of the following is a technology that provides high-speed Internet connection using the telephone network? DSL

Which of the following is the development and maintenance of webpages? web publishing

Many browsers and websites do not require the http:// and www portions of a web address. True

Who is the creator of the World Wide Web? Tim Berners-Lee

An entertainment website contains content that describes a cause, opinion, or idea. False

A DNS server is able to identify which of the following? an IP address based on a domain name

The search engine operator AND is used to display hits that include only one word from a list. False

You are going to form a partnership with an organization that sells domain names. What kind of organization is your partner? registrar

Which of the following defines FTP sites at which anyone can transfer some, if not all, available files? anonymous

Examples of informational websites include libraries, encyclopedias, dictionaries, directories, guides, and other types of reference. True

The goal with TIFF graphics is to reach a balance between image quality and file size. False

Which of the following is a digital representation of nontext information such as a drawing, chart, or photo? graphic

Which of the following is a computer that allows users to upload and/or download files using FTP? FTP server

All mobile browsers support the use of plug-ins. False

Which of the following includes music, speech, or any other sound? audio

A megabyte is equal to approximately one billion characters. False

What is the purpose of an Internet Protocol address (IP address)? It uniquely identifies the location of each computer or device connected to the Internet.

Which of the following consists of a worldwide collection of electronic documents? web

A mobile processor is a type of software for computers and mobile devices that reads a user's specified web feeds and collects their most recent content. False

Which of the following terms refers to any application that combines text with graphics, animation, audio, video, and/or virtual reality? multimedia

IF YOU RECEIVE AN EMAIL MESSAGE IN ALL CAPITAL LETTERS, WHAT DOES THIS SIGNIFY? THE PERSON WHO WROTE THE EMAIL WAS SHOUTING AT YOU.

A host in a network performs which of the following tasks? provides services and connections to other computers on the network

Some audio files require you to download a media player. True

To what does the term, blogosphere, refer? the worldwide collection of blogs

One technique to improve Web searches is to use general nouns and put the less specific terms first in the search text. False

Some home users connect computers to the Internet via slower-speed dial-up access because of its lower cost or because broadband access is not available where they live. True

In internet terminology, what is the term, google. com, called? domain name

You are using a website to check the ticket availability for your flight to Denmark. To what category does this website belong? dynamic websites

Which of the following terms means that the people who are conversing on a computer are online at the same time? real time

An Internet connection is not necessary for participating in e-commerce.

False

What term is used to describe the harassment of computer users through various forms of Internet communications? cyberbullying

Webpage developers often use FTP to upload their webpages to a web server. True

What is the approximate data usage for sending and receiving 100 messages with no attachments? 3-6 MB

A bookmarking site is a website that enables members to manage and share media such as photos, videos, and music. False

What is the World Wide Web? a worldwide collection of electronic documents

<https://assignbuster.com/mis-2223-exam-1/>

Which of the following is application software that allows users to access and view webpages? browser

If someone's boss wanted to send a message to an employee that contains both a video and a Word processing document, which Internet service would be the most appropriate for her to use? email

In the evaluation of a website, the evaluation criterion of authority states that a reputable institution should support the website without bias in the information. False

Which of the following is the code of acceptable behaviors users should follow while on the Internet; that is, it is the conduct expected of individuals while online? netiquette

A search engine displays a list of webpage names that contains the search text. What is the term for that list? hits

Which of the following are valid TLDs? gov, org, net

Which of the following is a real-time Internet communications service that notifies users when one or more people are online and then allows them to exchange messages or files or join a private chat room? IM

You have a new application that is taking full advantage of the features of your smartphone, including the touch screen and an embedded GPS receiver. What kind of application is this? mobile app

To what does the term, traffic, refer to when used in conjunction with the Internet? the communications activity on the Internet

When two people are conversing over the Internet in real time, what do you know about them? They both are online.

When you enter a domain name, the DNS server translates the domain name to its associated IP address of that data and information can be routed to the correct computer. True

Your sister just started a company that provides individuals and organizations access to the Internet for a small fee. Which of the following describes her company? access provider

Which of the following is a small version of a larger graphic? thumbnail

A disadvantage with a subject directory is that users sometimes have difficulty deciding which categories to choose as they work through the menus of links presented. True

To find a webpage, the user of a search engine would simply enter a word or phrase in the resource's text box. What is the term for that phrase? search text

Several browsers are available at shareware websites. True

You are looking for the basic storage unit on a mobile device. Which of the following represents a single character? byte

You have just done some online banking. Which of the following could contain your account number? cache

Which of the following is NOT a graphics format used on the web? AVI

For watching HD streaming video for an hour, the approximate data usage is 3-6 MB. False

What is the descriptor for a filter that warns or blocks you from potentially fraudulent or suspicious websites? phishing

What is the term for a combination of user name and domain name that identifies a user so he or she can receive Internet email? email address

Which of the following is the process of transferring data in a continuous and even flow, which allows users to access and use a file while it is transmitting? streaming

Which of the following are criteria for evaluating a website's content? objectivity and currency

The JPEG format works best for images that have only a few colors. False

Which of the following is equal to approximately one million characters? megabyte

The major carriers of Internet network traffic are known collectively by what term? Internet backbone

The Internet has its roots in a network that became functional in 1969, linking scientific and academic researchers across the United States. What was the name of that network? ARPANET

Cybercafes exist in cities in the U. S. but not elsewhere. False

You are looking for a browser that will run on your computer, which uses the Linux operating system. Which of the following is an option for you? Firefox

Which of the following is a business that provides individuals and companies access to the Internet for free or for a fee? access provider

Which of the following communicates with a satellite dish to provide high-speed Internet connections via satellite? satellite modem

Which of the following consists of images displayed in motion? video

What is the term for the transmission of messages and files via a computer network? email

The goal of Internet2 is to develop and test advanced network technologies that will benefit Internet users in the future. True

Which of the following networks had these two goals: a) allowing scientists to work together on scientific projects; and, b) functioning even if part of the network was destroyed by a nuclear attack? ARPANET

According to netiquette, Internet users should assume which of the following? The use of all capital letters is the equivalent of shouting

What is the term for an electronic document on the web that can contain text, graphics, animation, audio (sound), and video? webpage

Which of the following best describes e-commerce? A business transaction that occurs over an electronic network such as the Internet

You have a new web app and the host for it is going to provide storage for your data on their server. What is this called? cloud storage

In a search engine, parentheses are used to combine hits that include specific words with those that only include one word from a list. True

Most current web browsers support tabbed browsing, where the top of the browser displays a tab for each webpage you open. True

If your friend is enjoying a cup of coffee in a trendy coffee shop and at the same time is surfing the web, which of the following is she using? a hotspot

All social networking sites require friends to confirm a friendship. False

Which type of disc is a type of storage media that consists of a flat, round, portable metal disc made of metal, plastic, and lacquer that is written and read by a laser? optical

CAM is used by a variety of industries, including oil drilling, power generating, food production, and automobile manufacturing. True

The capability of the computer to recognize spoken words is a direct result of scientific experimentation with cochlear implants. False

With which of the following can users transfer items to and from other computer on the Internet? FTP

With contemporary antivirus protection it is now possible to ensure a virus or malware never will attack your computer. False

Which of the following is a typical size for a game console? four pounds

Never start a computer with removable media inserted in the computer unless you are certain the media are uninfected. True

You cannot make copies of media, even as a personal backup, without violating copyright. False

If a tablet has no keyboard, how do you type on it? You use an on-screen keyboard.

What consist(s) of a series of related instructions that tells the computer what tasks to perform and how to perform them? Software

An organization to which you belong is joining the W3C. What is the mission of the work you will undertake as a member? To ensure the continued growth of the web.

A lower bandwidth means more data transmits. False

The asterisk search engine operator allows the substitution of characters in place of the asterisk. True

For which of the following to work must both parties be online at the same time, and the receiver of a message be willing to accept messages? instant messaging

Which of the following is the process of transferring files from a computer to a server on the Internet? uploading

Which of the following search texts will display pizza or sandwich places in New Orleans? New Orleans (pizza or sandwich)

Which of the following terms would you be looking for if you want to make a purchase of a variety of software at the same time that you purchase your new desktop? bundle

Netbooks weigh more than traditional laptops, like the kind shown in the accompanying figure. false

You go to your local town utility in order to pay your gas bill. Which of the following are you most likely to use? financial kiosk

E-books have no wear and tear. true

Which of the following is an external device that provides connections to peripheral devices through ports built into the device? port replicator

Which of the following may need to happen before your Bluetooth headset can communicate with your smartphone? They might need to be paired

A computer salesman refers to the shape and size of your new computer by a specific term. What term does he use? form factor

Which of the following is an example of an operating system? Windows

Your organization has a large number of servers. Which of the following are you most likely to choose as a result? Blade server

A mobile console is a device that combines features of a smartphone with a tablet, like the one shown in the accompanying figure. False

What is the term for the smallest element in an electronic image? pixel

Your Bluetooth headset is waiting for another Bluetooth device to locate its signal. What is this mode known as? discoverable mode

Some handheld game device models are Internet capable for downloading games and apps. True

Batteries in a laptop, like the kind shown in the accompanying figure, typically last longer than those in a tablet. False

A type of computer usually has thousands of users. Which of the following is most likely to be the type of computer? Supercomputer

You have purchased a surge protector and you are happy with it, in part because it has an appropriate Joule rating. What is that rating? 600

Some users configure a desktop to function as a server on a network. True

Which of the following are you most likely to find on your next trip to an amusement park? ticket kiosk

Which of the following is the term for unsolicited mail messages? spam

You have just designed a device-tracking app for sale in the app marketplace. Which of the following are you least likely to use in your app?
UNIX

You keep hearing a colleague of yours use a term and you are unfamiliar with it. Ultimately, however, you realize that it is a synonym for the term port. What is it? jack

You need to restore a computer that has suffered a catastrophic failure.

Which of the following are you most likely to use? backup server

What percent of e-waste is recycled? 20

Docking stations may include slots for memory cards, optical disc drives, and other devices. True

You have a camera with a 16 MP resolution. How many pixels are represented by that resolution? 16 million

People suffering from technology overload feel distressed when deprived of technology, even for a short length of time. True

A joystick is a handheld vertical lever, mounted on a base, that you move in different directions to control the actions of the simulated vehicle or player.
true

The input from a POS terminal serves as output to other computers to maintain sales records, update inventory, verify credit, and perform other activities associated with sales transactions. false

A port replicator is similar to a docking station, but it has more functionality.
False

Which of the following is held with both hands and controls the movement and actions of players or objects in video games or computer games?
Gamepad

You need a version of USB technology that will support older USB devices, of which you have many, as well as newer ones. What word do you want to see in the specs? backward compatible

Which of the following protects against electrical power variations? surge protector

If a POS terminal is able to update inventory at geographically separate locations, what is the term for this ability? Internet capable

Your server room has ample floor space. Which of the following are you most likely to choose as a result? Tower server

While ultrathin laptops like the kind shown in the accompanying figure are adequate for everyday computing tasks, you would want to use a netbook to complete processor-intensive tasks. false

Some cloud computing services automatically add more network and server capacity to a company's website as demand for services of the website increase. True

A friend of yours was talking on a mobile phone and her attention was diverted from something that was happening around her while she was on the phone. What phenomenon does this illustrate? Inattention blindness

Many handheld computers communicate wirelessly with other devices or computers. true

Which of the following is the process of initiating contact between two Bluetooth devices and allowing them to communicate with each other?
pairing

If you are looking to use a Bluetooth device and do not want to extend its range with additional equipment, which of the following is the approximate distance you can expect between your device and the device with which it is transmitting data? 33 feet

Newer versions of USB can charge connected mobile devices even when the computer is not in use. true

A type of computer usually has only one user. Which of the following is most likely to be the type of computer? personal computer

Which of the following is the practice of sharing computing resources, such as servers, like those in the accompanying figure? virtualization

Point-and-shoot cameras are much heavier and larger than SLR cameras.
false

Which of the following refers to the case that contains and protects the motherboard? system unit

Which of the following is not a determinant of the category in which a computer best fits? resolution

You need to store and manage all the Microsoft Office files for your office. Which of the following are you most likely to use? storage server

You are outside in a public park with your friend. Both of you have Wi-Fi devices. For the devices to communicate with each other, what is the maximum distance they can be apart? 300 feet

You have a new e-book reader and you are expecting to be away on a long hike with it. How many hours of reading can you get from it before needing to recharge it? 75

Which of the following kinds of computing refers to an environment of servers that house and provide access to resources users access through the Internet? cloud

Which of the following terms includes speakers, webcams, and printers as examples? peripherals

Which of the following are capable of processing many trillions of instructions in a single second? supercomputers

One symptom of technology addiction is the inability to stop using technology. True

Your electric service has been failing with some frequency lately because of a lot of storms, and you are looking for more peace of mind when it comes to a reliable power source for your computer. Which of the following could help? UPS

Which of the following is built into an upright cabinet that stands alone? tower server

Cloud computing uses server virtualization. True

A large amount of e-waste ends up polluting developing countries, who accept the materials for profit. True

A thief has unfortunately captured your ATM card number by placing a panel on top of the face of an ATM, which was virtually undetectable to you. What is this technology called? skimmer

A UPS connects your computer and a power source. true

Ergonomic studies have shown that using the correct type and configuration of chair, keyboard, display device, and work surface helps users work comfortably and efficiently and helps protect their health. True

Which of the following is NOT a type of kiosk? media

Your data center is looking to conserve space in its server room. Which of the following are you most likely to choose as a result? blade server

You have a new phone. What determines what type of messages you can send? the services offered by the mobile service provider

One common method of thwarting a smartphone thief is not to use the phone to check the time. true

You are looking for a computer to provide a central location for online game play. What kind of computer do you need? server

Features typically not found in cameras built into mobile phones include optical zoom, additional lenses, and scene modes. true

A brownout is a complete power failure. false

You are looking for a general-purpose port to connect two devices together.

Which of the following is your best bet? Thunderbolt

Which of the following is not true of the thin client on your desk at your office? it has extensive capabilities

You want to connect your mobile device to a speaker. Which of the following is a way to do so? via a port

The video clips that users of video message services send are typically how long? 30 seconds

The trend is toward larger desktop tower form factors. false

Which of the following is an affordable and lightweight digital camera with lenses built into it and a screen that displays an approximation of the image to be photographed? point-and-shoot

Your new home has a vacuum system. What kind of computer is controlling it? embedded computer

What are the two main components on the motherboard? memory, processor

Malware authors rarely focus on social media because it is so difficult to get personal information via that channel. false

An ATM is a self-service banking terminal that connects to a host computer through a network. true

How many peripheral devices can you connect with a USB port? up to 127

It is estimated by one publisher that, on average, libraries replace a print book after how many checkouts? 26

Which of the following items in your pocket uses NFC technology? credit card

You are inside a sports arena with your friend. Both of you have Wi-Fi devices. For the devices to communicate with each other, what is the maximum distance they can be apart in this closed space? 100 feet

You received a new portable media player for your birthday. It is less than ideal as a gift, however, because you were hoping to do something with it, and it is not something you can do with the player. What is that thing you were hoping to do? manage a server

You are storing a new worksheet online for members of your project team to be able to share access to it. What kind of computing is this an example of? cloud

You are going to make a decision about a server purchase based on whether it is a rack server, a blade server, or a tower server. On which of the following are you basing your decision? form factor

Short text messages sent via a text message service are typically fewer than how many characters? 300

You need to set up a computer to store and deliver email messages for your small business. Which of the following are you most likely to use? mail server

Port replicators sometimes disable ports on the mobile computer to prevent conflicts among the devices on the computer and port replicator. true

Eyestrain associated with CVS is not thought to have serious or long-term consequences. true

When an instrument in the dashboard of your car informs you the air pressure in the right rear tire is low, what type of computer determines the air pressure is low? embedded computer

Which of the following are small speakers that rest inside each ear canal? earbuds

Which of the following exists in the form of a single circuit board? blade server

Peripheral devices usually occupy space inside a system unit. false

Which of the following types of computers targets a specific audience and offers high-quality audio, video, and graphics with optimal performance for sophisticated single-user and networked or Internet multiplayer games? gaming desktop

CTS is inflammation of a tendon due to repeated motion or stress on that tendon. false

Which of the following is a device that plugs in a USB port on the computer or mobile device and contains multiple USB ports? USB hub

Lower back pain sometimes is caused from poor posture true

Which of the following is a portable, personal computer designed to fit on your lap? notebook

Most computers and electronic devices are analog, which use continuous signals. false

Which of the following is your library using because it costs less, is easier to maintain, and uses less power than desktop computers? thin client

At a higher resolution, you can capture and store more images in your digital camera. false

Which of the following is a special-purpose computer that functions as a component in a larger product? embedded computer

Unlike answering machines, a computer in a voice mail system converts an analog voice message into digital form. true

Which of the following is not a part of a server like the one in the accompanying figure? bundled software

Many game console models include internal disk drives or memory to store games and other media. true

Which of the following cameras is a high-end digital camera that has interchangeable lenses and uses a mirror to display on its screen an exact replica of the image to be photographed? SLR

Teen drivers statistically are more susceptible to being distracted while driving. True

One advantage of dedicated servers is that they usually do not demand as much memory or storage as other computers. false

Which of the following occurs when the incoming electrical supply or voltage increases, often defined as more than five percent, above the normal volts?
overvoltage

What is the term for the technology that allows users to view message details such as the length of calls, for example? visual voice mail

Which of the following would allow you to capture a series of images with your camera in rapid succession? burst mode
