During this research work for informations aggregation, some specific production planning and control inquirers and interviews conducted. Some of them are structured and while some unstructured.

Interviews conducted,

- Face to confront
- Telephonic
- Face book
- Net chatting
- While questionnaires completed during
- Conversation with respondent
- By electronic mail
- By station and
- By telephones

STRUCTURED INTERVIEW FOR PRODUCTION PLANING AND CONTROL

1. Is organisation fulfilling client demand?
2. Is organisation achieve the lowest cost?
3. Addition of inventory degree by addition of client demand?
4. Keeping costs estimated at high degree?
5. Entire and cost non estimated at minimal degree?
6. Is minimum cost as a consequence cause neglecting to provide the client demand and its effect is loss for the company?
7. Is production a driving force to which most other maps reacts in any fabrication activity?
8. Are clients satisfied bringing agendas?
9. Are paths and agendas established?
10. The program for the processing of stuffs through the works established through the maps of procedure planning, burden, and scheduling?
11. The map of despatching puts the program into consequence that is, operations started in conformity with the works?
12. Actual public presentation compared to the planned public presentation and action taken when required restorative?
13. Procedure Planning (Routing) in pattern?
14. Are fulfilling client demand?
15. Is accomplishment of the lowest cost?

16. Procedure planning (Routing) must necessitate?
17. Loading of the work required against the selected machine or workstation?
18. Scheduling for the inventory for be aftering maps?
19. Uniting maps in a full procedure
20. Dispatching i-e. authorising the start of an operation on the store floor should be seasonably
21. Reporting or follow - up for all procedures, production and public presentations
22. Corrective actions for production planning and control extremely recmended
23. Re-planning factors for all sercomstances
24. Issues which can impacting production planning and control
25. Type of Merchandise
26. Type of Manufacturing
27. Production Planning and Control Procedures followed
28. Production Planning and Control Systems followed
29. Market prognosis ever checked before get downing production
30. Gross saless order should stipulate that what has coustomer has purchased
31. Stock order should stipulate that what has left over in stock
32. Shop order should stipulate that what is pipe line for fabrication
33. Standard procedure sheet generated
34. Engineering specifications considered and maintained
35. Route sheet ever followed
36. Load Charts formulated

37. Job Tickets assigned
38. In an organisation there should be no individual form for the organisation of the production planning and control activity
39. Centralized Production Planning and Control for certain procedures
40. Decentralized Production Planning and Control harmonizing to state of affairs and requirements
41. Good relationships with other maps in an organisation
42. Measurement of effectiveness vision, mission and planning on a regular basis
43. Site Selection should be made in conformity with handiness of natural stuffs, work force and transit

45. Machinery should be up dated
46. Transportation system of stuffs and merchandises through quick services
47. Handiness of Materials ever on a regular basis checked
48. Procurement of Materials in conformity with order
49. Production planning and control should be practical
50. Quality Control is your basic undertaking
51. Output should be checked on a regular basis
52. Efficacy of machines and homo maintained
53. Performance of both machine and working force monitored

STRUCTURED INTERVIEW FOR PERFORMANCE MEASUREMENT

1. Is public presentation measuring mechanism for reviewed and revised for marks and criterions?
2. Are single steps as public presentation and circumstance alteration developed?
3. Is public presentation measuring used as challenge the strategic premises?
4. What are tools and techniques for monitoring, commanding, look intoing and job resolution?
5. Effect diagram and cause made.
6. Run chart followed.
7. Scatter diagram in operation?
8. Flow chart?
9. Pareto chart
10. Histogram
11. Control chart
12. Affinity diagram
13. Interrelationship digram
14. Tree diagram
15. Prioritisation grid
16. Matrix diagram
17. Process determination plan chart
18. Activity web diagram
19. In the executive squad meeting if an fails to travel efficaciously towards its strategic aims so the causes should be analysed and might include:

20. Under-performance at a lower degree
21. Strategic aims are non communicated efficaciously
22. Strategic aims have non been defined decently
23. Validity/Relevance of the aims
24. The supports tools for the class of action should besides include,
25. Swerve analysis tools? Control Charts
26. Relationship analysis Tools? Correlation analysis, Multivariate analysis, Cause and consequence diagrams, Pareto charts
27. Checking the consistence of the PMS communicating?
Departmental studies and input
28. Always check the cogency of the mission and vision statements and the company 's strategic aim still back up the mission and vision of the administration.
