

# Global warming essay

**ASSIGN  
BUSTER**

One of the biggest jobs confronting the universe today is planetary warming. Many experts believe that our production of C dioxide and other nursery gases is heating the ambiance. and this could be really unsafe for human life. This essay will analyze the job of planetary heating and propose some solutions for it.

Many jobs could ensue from planetary heating. One of the biggest is lifting sea degree. This could ensue in the implosion therapy of low lying coastal countries and metropoliss. such as Egypt. the Netherlands. and Bangladesh. Another job is alterations in conditions forms. Many countries of the universe are sing increased hurricanes. inundations. and other natural catastrophes. A concluding issue associated with this phenomenon is the negative consequence on animate beings. Fish populations could be effected. while some insects which spread disease might go more common.

Pg. 288 # 2. 3. 7

2. Define:
