

High school struggle days

Business

**ASSIGN
BUSTER**

It's too hard to be a high school student because there are many paper works to do, assignments to answer and topics to be reviewed. I'm not complaining, but actually I am so thankful that I am still studying but the problem is some teachers are so strict in their subjects. They give us difficult ways to make a decision to get the best grades. I keep understanding their sides but still why some of them are using the time of others' subjects just to finish the topic.

For all high school students especially grade 9 be ready and Never surrender

.
