

Physician and sports medicine essay

**ASSIGN
BUSTER**

Some terms I will have to define simply because steroids affects uses a lot of medical terminology that my audience maybe unfamiliar with. Will you include anecdotal evidence? I may include some anecdotal evidence more than likely I will not. Due to the fact that my research question is a question that is reassured with a lot of solid facts and proven research.

Will you include opposing views and comparing and contrasting them to your views? Along the lines of the affects of Steroids no opposing view will be stated but possibly when referring to whether or not one believes steroids are okay to use. What topic sentences will you use in your body paragraphs?
1) " Steroid abuse disrupts the normal production of hormones in the body causing both reversible and irreversible changes. " 2) Acne, testicular decrease, and breast production in men are few of the physical consequences that are faced when taking steroids. 3) Steroids may make the body appear ripped and lean on the outside but the internal function of your body tells the real story.

Intended audience: Who is your audience and why? My target audience is athletes or those who are currently using steroids or contemplating about it. I am aiming to inform them of the dangers and potentially influence them to quit usage or choose a more natural route. I am using basic wording and terminology that maybe a bit difficult will be followed up with a brief definition. The use of specialized information from direct sports related sources will be used. Working Bibliography List: " The ' Road to Ruin.
