School Management System Case Study:

School management is the complex of decisions, solutions, actions and policies which regulate the organization of the school, its educational process and the rights and duties of students and teachers. The government of every development country which cares of its educational system and satisfaction with the process of both teachers and students introduces computer technologies into the organization of the educational process.

School management system is the set of computer software which is used with the purpose to organize the process logically and conveniently for everyone. For example, the system contains rich databases, which inform students about the working day, any innovations, changes in the timetable, etc. With the help of school management system one will find his marks on every subject, will see his debts, what he has to hand in and whether his general progress is successful. Parents are quite satisfied with the abilities of the system, because with its help they always can control the educational progress of their children, their attendance and get to know what subjects and topics they learn, what problems has their child and what he is good at. School management system makes the educational process well-organized and does not let student waste their time and offers a range of sections where students can be involved at their free time.

School management system is the great innovation in the school life, because due to the software every class and activity is well-organized and helps students orientate at school. A student who has smart ideas concerning school management system is given a chance to prepare a good
