

Css html

**ASSIGN  
BUSTER**

style a rule describing how to format a particular portion of a web page  
style sheet a set of style ONCSS/HTML SPECIFICALLY FOR YOU FOR ONLY \$13.  
90/PAGE Order Now tags instructions that tell a web browser how to display  
the web page DOCTYPE tells the web browser what type of HTML the page  
uses the Internet interconnected network of computer networks HTML The set  
of markup symbols or codes placed in a  
file intended for display on a web browser hypertext text which contains links  
to other texts XHTML HTML organized for different operating systems so that  
your web pages appear correctly and consistently in web browsers why  
specify a doctype? transitional doctype provides a transition from older HTML  
to the newer strict doctype intended for newer HTML and  
XHTML CSS Cascading Style Sheets CSS gives you creative control over the  
layout and design of your web pages What are advantages of using CSS?  
internal style sheets a collection of style that's part of the web page's  
code external style sheets a text file containing all your CSS rules inline style  
sheets CSS rules put directly into a page's HTML RGB colors color value  
consisting of three numbers representing either percentages or numbers  
between 0 and 255 for each hue hue red, green, or blue value contains three  
hexadecimal numbers JPG graphics good for photos GIF Graphics Interchange  
Format PNG Portable Network Graphics 2 types of PNG 8 bit and 24 bit web-  
friendly file formats are small fixed-width layout regardless of browser's width,  
the page's width stays the same liquid layouts adjusts to fit the browser's  
width elastic layouts fixed-width design with type size flexibility absolute  
positioning determines an element's location by specifying a position float  
tag how can you create full-height columns relative positioning elements are  
placed relative to its position in HTML inside nested tags when and where do
