

Organizational behavior chapter 9

**ASSIGN
BUSTER**

Technology the scientific method used in achieving a practical purpose.

Technological determinism states " what can be developed will be developed"

Ethical lagsituation in which the speed of technological change far exceed that of ethical development

Symptom of technological intoxication include:

- We favor the quick fix

- We accept violence as normal
- We love technology as a toy
- We live our lives distanced and distracted.

e-commerceSelling products and services online

Intellectual propertycopyrighted material, i. e. movies, songs, and poems

Surveillanceuse of electronic means by a company to watch or monitor its employees

number one ethical issue in doing business over the Internetpotential invasion of privacy

Phishingtechnique that lures prey into revealing passwords and other private data by providing a convincing online offer

Most intensely monitored employee activitiese-mail, texting, and or other Internet usage

Primary reasons that companies use surveillance due to the advent and availability of inexpensive surveillance technologies

Bioethics deals with the ethical issues embedded in the use of biotechnology

Non GMO movement about the safety of genetically modified foods
