

Why i want to have a career in computer information system

Education

**ASSIGN
BUSTER**

Conversely, it is evident that we are living in a fast-changing world powered by globalization and rapid technological advancement. In this case, a major in Computer Information System would help me achieve my ambition in life by enabling me to become equipped to join the information and technology world and develop the technology required to continue making the life of human beings better on earth. While emphasizing on the importance of changing my major to Computer Information System, humanity cannot live oblivious of the fact that experiences at home, school, and work are undergoing many changes due to the various technological advancements taking place in today's world. Hence, as an individual who desires a career in a fast-changing environment, whereby I will always improve my performance while at the same time improving my knowledge, I believe that a major in Computer Information System will help me achieve this long-held ambition.
