Lecturer: The Odyssey “ The Odyssey” was written by Homer in 1996.

Bernard Knox edited it, and Robert Fagles interpreted the book. Odyssey is a documentation book that reveals the passage of every man in life. Fagles translates the poem of the author’s retold original information. It is one of the ancient Greek poems that were created during the late 8th century.

Fagles translated it in a manner that makes it appealing, and he captured the author’s words; thus narrating them in lyrics. The storyline does not appear vibrant; though, the actions are plausible. It is an incredible, prominent manuscript for both the early Greeks and the western civilization.

It is among the popular classic books because of diverse genres and all types of lyric poems. The book has several chapters starting from the journey of

Odyssey up to the end when he returns home. It reveals the life story of

Odyssey and the way he disappears for about 20 years from home. After

Odysseus's disappearance that makes people thinks that he was killed, many suitors came to marry Penelopia, but the story ends when Odysseus returns home and kills the suitors. Many scholars have argued about Homer as being

the woman. Homer is a tribal given name or identity of an individual who is praised with authorship of vibrant epic stories including the Iliad or Odyssey.

These books contain twenty-four sections of hexameter poetry in a Greek

language. The initial section of the Odysseus description tackles the famous

events of the Trojan warfare and it bears utmost awareness of the Greek

force worriers. Another section deals with the return from war after 20 years.

Homer has written short poem addressing to gods. However, there is a long

debate about the identity of Homer. From the poem of Homer, one can guess

that his name can be linked to the middle age during the ancient times of

Greek. The narrative that the author presents dates back during the earlier

period of 1100 BC, the time when historical events in the Exodus stories were common. The life of Homer and his identity have been a critical question because they are obscured. There are no other reliable data that can provide trustworthy information about whether Homer is a he or she. This is unless one should glean on her or his poems from archaeological clues. There are strong believes that woman could have written the book of Odyssey. Even various scholars argue that the book was written by a female or many women in a group may perhaps have written it. This is because of the way many things in the book are worded in femininity way. In the ancient Greek, women were viewed as being inferior to men; thus they could not sit together with men and be part of them in the decision making process. It was only few females who played considerable roles in the society, but men profoundly dominated in the early Greek world. In the book of Homer, women played significant roles, and they could not humble themselves, but rather offer advice and wisdom. They even took care of themselves as seen in the example of Odyssey's wife when her husband left for 20 years. Therefore, the roles of women as being revealed in the book of Homer contributes to the notion that the book could have been written by a woman or group of women because of the way it emphasizes on femininity roles. The book has strong female writing features in it; thus contributing to the notion that Odyssey was written by a woman. For instance, the goddesses play significant, controlling roles and the most powerful " goddesses is Athena" (Homer, Fagles and Knox 24). Athena makes many things take place throughout the narrative. Another leading female is known as Calypso, and she holds Odysseus in exile for several years. Among these fatal women, there are many intelligent females with supremacy including Helen,

Nausicaa and others. Penelopia, Odysseus' wife is one of the exceptional characters in the storyline. She waited for countless years her spouse to return home in spite of the fact that many suitors wanted to wed her. She seems to be humble but extremely wise. This is because she does not send off suitors, but "delude the wits of a whole nation" (Homer, Fagles and Knox 24). She fooled the suitors and made promises for every suitor by sending special messages to them, which were quite different. Penelopia fooled them many times through making false excuses that she had knit a burial blanket. She kept pretending to do so and during the night, she could tear the knit and starts a fresh in the morning. Though, many men discovered the plan and felt angry because of cheating them; thus making the suitors wait for a long time. The knowledge and intelligence of Penelopia is revealed throughout the whole narrative. The book of Odysseus reveals the way many women were wise; thus an indication that it was written by a woman. The seductresses literally devices employed in developing the main theme of the book reveal that the book was written by a woman. The writer reveals the way female in this story are important figures in this book. One of the recognized tasks they play is seductress. Amongst the seductresses females in the book are Circe and Calypso. The love or seduction to Odysseus makes the situation difficult for him to go back home to Penelopia. He author reveals many females whose enticing behaviors and attraction to men threatens me; thus putting them into astray. For instance, the fooling behaviors of suitors by Penelope appear to lead men to her home, and this is one way of seduction. The idea of weaving the "burial shroud" makes many suitors offer her many gifts (Homer, Fagles and Knox 29). She cheats men to wait until she finishes weaving the thread and seduces them; thus an indication
