Asignment assignment

No marks will be awarded for the entire assignment if any part of it is found to be pied directly from printed materials or from another student. 2. All submissions should be made on or before the due date. 3. Any late submissions after the deadline will not be entertained. 4. Zero (O) mark will be awarded for late submission, unless extenuating circumstances are upheld. Scenario Computer everywhere Computers are everywhere. Watching television. Driving a car, using a credit card, even ordering fast food all involve computers, not to mention browsing the Web on your personal computer.

Your car computer is an embedded computer that can be ascribed a special-purpose, because it only accepts input and performs limited functions. Your personal computer, on the other hand, Is general-purpose, meaning It accepts a wide range of input and can perform a variety of tasks. For one day, make a list of each computer you encounter (be careful not to limit yourself Just to the computers you see). How is the computer used? Is the computer special-purpose or general-purpose? Why? How was the task the computer performs accomplished before computers? Write a detail report your finding.

The Assessment This assignment will contribute 50% towards the module marks, as mentioned In the student Assessment & Information sheet. This assignment will be evaluated based on the following criteria. Marks will be awarded based on: Criteria Weight In Package understanding Demonstrating a sound knowledge and understanding of the scenario study in I OFF 25 Research and Analysis Discussion and analysis of the process that takes

place based on the scenario given. Critical thinking and Applicability This includes analysis and evaluation of facts followed by results of evaluation.
