

Ignite
entrepreneurship and
bring me a step
closer

**ASSIGN
BUSTER**

Ignite 2018 Trek will give me a boost to improve my entrepreneurship and technological skills as a Graduate student. I will get to know the challenging journeys of the innovators from Silicon Valley from their life experiences.

It will change my perspective of looking towards entrepreneurship and bring me a step closer towards my dream. Silicon Valley houses the biggest high-tech manufacturing center in the US and continues to be the leading hub for innovation and development. It holds top companies with innovative minds and entrepreneurs like Google and Facebook.

Being a Chemical Engineering Graduate student of Lamar University, I am deeply engrossed in learning innovation of technologies of Process Engineering sector. With the advancement of new technologies, it has become necessary to update with knowledge and skills to survive in the competitive environment. In a startup, it is of utmost importance to have the technological and entrepreneurship skills to succeed. And so, through Lamar, I am getting the required skills of Process Technology. This trek will give me the broad and practical knowledge of Entrepreneurship skills, which will get added to my skillset. Internships help in gaining relevant knowledge, skills, and experience while establishing important connections in the field.

Internships are Invaluable and Imperative.

This entrepreneurship trek will give me a great opportunity to meet with employers and develop a network which will not only help me in getting an Internship but also in landing my dream job with the companies of Silicon Valley. This Entrepreneurship trek will give me an opportunity to meet the innovators in an intimate setting, which is a very rare opportunity at this level

to learn and get the practical experience from them. It will augment my profile and will prove advantageous to me in future in a startup or for my professional endeavor.
