

Experiencing difficulties

[Education](#)

My family has lived in Philadelphia for many years. We have seen people come and go from our lives and we have experienced many difficulties we were forced to face. I want my child to live a successful life so he and his children do not have to face the troubles that I and my ancestors were forced to endure for so long.

My family needs your help. The life of poverty is not one that I would wish upon my descendants. If I could make a wish it would be that my child would be able to escape from poverty and flourish. Thank you for your time and I will hope that you would select my family to receive your wonderful scholarship.
