

Despite setbacks and failures last semester

**ASSIGN
BUSTER**

To persevere to pass last semester's classes was a very taxing one for me. I met difficulties along the way; add to these my father getting seriously ill and his company having financial difficulties and eventually putting additional financial burdens to our family.

I have to work hard to support myself due to the fact that my parents keep having a difficulty in supporting my education.

But with patience, I persevered learning my subject lessons one by one, little by little, until such time that, despite occasional setbacks and failures, I eventually hurdled the past semester. I have learned that to reach a particular goal, patience, perseverance and a lot of faith in one's self are the traits needed to reach it.

2) Ensuring success in the future could be achieved by maximizing chances and using these to my own advantage. Despite setbacks and failures last semester, I learned my personal lessons, though in hard ways, yet I learned also how to overcome the problem of passing a given semester.

Steps are to be taken; I should study in advance, reading every detail of my lessons, listen to what the professors try to convey to their students, and I have to take notes so that later when I go home I can review them before taking a rest.

These steps, although few, are basic proven measures to pass a given semester. I have to take some time off my extra hours and spend them in the library so that I will have an edge over my fellow student given a particular subject.

3) Having practiced the stated steps and integrated them to my academic lifestyle, what remains to be done is to polished these steps and measures by refining the way I study, the way I ask questions and in answering them, and put extra concentration to my academic studies.

There will be no particular date or schedule to implement these steps upon my education simply because I have to practice these every day and every week, so that in the long run, these will become part of my consciousness.
