16. peace talks between Khartoum and Jem

17. thousands of peacekeepers

18. A taste of hope

19. tell people to refocus

20. Its not over

Themes and Main Ideas

The theme of genocide is evident in the case of Darfur considering that the area witnesses a lot of violence, rape, killings, and other atrocities against innocent people. The situation of Darfur seems pathetic in spite of the interventions of the international community. The theme of activism features prominently in the situation of Darfur. Many people both locals, foreigners, and international organizations are playing a role in trying to bring sanity back to the region. Some local leaders are urging the people of Darfur to refocus and do whatever they can to make their lives better in spite of the situation. Because of the activism of different parties, the international

community has responded to help Darfur overcome the conflict and deplorable situation it is going through.

The theme of hope is well presented in the case of Darfur. Although the situation of the ground is bad with bloodshed, murder, rape and theft being the order of the day, many people in Darfur are clinging onto hope. They hope for a better future. Some leaders are urging locals to refocus and are spreading a message of hope in the midst of the turmoil. Their message is “Its not over”. Some people have lost their lives in the hope that the situation in Darfur has become better.
