Nyasia Lopez 2nd Period 2/2/12 Child Development Howard Gardner Howard Gardner was born on July, 1943. He's 68 years old and lives in Scranton, Pennsylvania. He went to Harvard University. Gardner sees himself as an independent scholar and a public intellectual. An interesting fact about him is that his theory of multiple intelligences has not been readily accepted within academic psychology, but has been highly influential in education. Howard Gardner's most popular theory is the Theory of Multiple Intelligences. It was proposed in 1983 as a model of intellectual capability that distinguishes intelligence into various specific theories.

Like someone who learns to multiply faster than another person isn't automatically smarter. Someone who takes more time to master simple multiplication 1) may learn best under a different approach, 2) may be better in a different area of studies, 3) may be looking at and understanding the multiplication process at a deeper level, or as an entirely different method. A deeper understanding can look like slowness and can hide the mathematical intelligence possibly higher than that of the other child. There are 7 intelligences that are a part of this theory. They are: 1.

Logical-Mathematical Intelligence -Consists of the ability to detect patterns, reason and think logically. 2. Linguistic Intelligence -Mastering a language. - Being able to express oneself and use language as a means to remember info. 3. Spatial Intelligence -Ability to manipulate and create mental images, to solve problems. This intelligence is also formed in people who are blind. 4. Musical Intelligence -Capability to recognize and compose musical pitches, tones and rhythms. 5. Bodily-Kinesthetic Intelligence -Ability to use one's mental abilities to coordinate one's own bodily movements. . Personal

Intelligence -Interpersonal feelings, intentions of others. 7. Interpersonal Intelligence -Ability to understand one's own feelings and motivations. The books that Howard Gardner wrote were: 1) Making Good 2) Changing Minds 3) Development and Education of the Mind 4) M. I. -New Horizons 5) Five Minds for the Future 6) Responsibility at Work 7) Truth, Beauty and Goodness Reframed: Educating for the Virtues in the Twenty-First Century Bibliography http://en.wikipedia.org/wiki/Howard_Gardner http://chants.coastal.edu/cetl/resources/Multiple_Intelligences.pdf
