

Letter participants to  
understand and work  
without

**ASSIGN  
BUSTER**

Letter of Recommendation I have known VINAMRAJAIN as his professor and project coordinator in Department of Electronics and Telecommunication Engineering. I have taught him ' Microprocessor and Microcontroller' and ' Telecommunication switching systems'. I found him to be well attentive in my lectures and capable of high academic potential. He performed very well and maintained above 70% in all the subjects I taught him. His approach is very logical and his nature to learn more gives him an edge to gain more thorough knowledge of the subject.

Another characteristic he possess is his imagination which he use well to figure many aspects of the subject for better understanding. I have been a project guide to VINAMRA JAIN in one of his project namely " Gesture controlled bot" and found his interest in programming and circuitry while guiding him to use best of his ability. He has a tenacious nature to not give up and keep working hard until he completes his target. His simple thinking allows him to think through the problem and come up with an effective solution. The fact that he had very little knowledge as per the requirement of the project at the time he started the project and even then he managed to complete the project satisfactorily shows his ability to research and learn fast.

Apart from academics he also showed interest in cultural activities and was the Head of AAYAAM 2k17 core committee which was the college annual fest and co-ordinated by me. He worked well with the team and has shown leadership skills and is capable to listen and handle people. His way of working was efficient and transparent enough with simplicity baked inside which made it easy for his team members and participants to understand and

work without problems. Also his ability to tackle problems and presence of mind makes him a good fit in a team. He comes across to be a confident student and is amicable.

He shows no hesitation in talking to faculty members and his seniors and classmates to clarify his doubts and gain more knowledge. He shows interest in learning not only about topics in his curriculum but also new innovations and related researches and has approached me several times regarding his interests and seeking knowledge. I have known VINAMRAJAIN and observed him very closely, I have full faith in him that he has the potential for higher studies and his skills in both technical and managerial fields makes him a great student. I highly recommend him for admission in your graduate program with suitable merit based financial support.
