

# Entering umass college for bachelor of health administration courses

[Health & Medicine](#)

**ASSIGN  
BUSTER**

College Admission Affiliation College Admission After conducting a research of several colleges with Health programs, I am applying to University of Massachusetts because of the excellent reputation and outstanding reviews by graduates and the public. Further, the medical program that University of Massachusetts offers includes a Bachelor of Health Administration course that excites me.

My interest for Health Administration course is something that has been part of my career goals since early childhood. Although I am just starting my undergraduate course, my ultimate career goal is to complete the Health Administration program at University of Massachusetts. Upon completion of this undergraduate program, I have great passion of continuing to obtain my graduate program. I am really encouraged, motivated and focused because I am convinced that I am in the right career path since I have a great passion for this and even have some family history.

I have a strong foundation of this field and have had a lot of inspiration from family and friends. I have attended Practical Nursing School in Cincinnati, Ohio, where I received training as a Practical Nurse. Further, I have worked as a Licensed Practical Nurse for seven years. During this period, I have had the opportunity to serve various people in the community and made an impact in their life. Considering that, I have shown quality service to the community during this period; my goal is to complete my Bachelor program in your institution so that I can be in a position to offer broad and better service to people. This has prepared a foundation for my success in this field.

Pursuing Health Administration has been my long-term goal, and I would like

to make this dream come true by obtaining a Bachelor of Health Administration from University of Massachusetts. I really appreciate your time and consideration, and look forward for a feedback soon.
