

Ufoy be found, of
monuments of good

**ASSIGN
BUSTER**

UFOy encounter with a UFO which happened in January of 1997, during a night when I was out in the desert. At first I was only able to remember a blazing red object coming toward me, but not what happened afterwards. A year after my encounter, I started seeing weird images and having visions of the future. I saw a scenario of recognition, of civilizations existing on other planets, of civilizations existing with fantastic technological achievements, of civilizations existing with tremendous scientific knowledge, of civilizations existing with people of various natures who have knowledge of all kinds, medical, artistic, cultural, etc. Another scenario I saw was of Biological Interference, of cross breeding with alien races, of giving of embryos or sperm for breeding experiments, of implantations of sperm or fertile eggs, of taking cells for examination, experimentation with cloning. Another scenario I saw was the Scenario of Induction, of an unseen secret organization of good will, of inspirational aids to solve problems and difficulties, of secrets of the past to be found, of monuments of good will recorded in lost places, of destruction of powerful evils to human/ earth Also I saw scenarios of Self-Development and Self-awareness, of offering new personal insights, of strengthening beliefs, of offering new projects, of support of a person's intentions/ambitions. There are many other scenarios and parts that came to me, and those can each or all merge one into another.

In one message, the aliens told me that the purpose of these images are to rejuvenate the earth, and to aid in the evolutionary development of man. This event in my life has definitely been the greatest obstacle that I have ever faced. Except for the time when I traveled to the center of the earth.
