

Environmental pollution outline assignment

**ASSIGN
BUSTER**

Environmental Pollution Outline Daniel Jenkins SCI/256 25 October 2011

MARIANNE KOT 1. Complete the rest of the worksheet based on the example above. Remember to be thorough in your answers and write in complete sentences.

a. Water Management 1) Describe Water Management and Use a) Freshwater sources b) Water supply problems c) Water conservation d)

Water use 2) Effects of Water Use and Management Practices on the

Environment a) Short-term effects b) Long-term effects b. Three Major Types

of Environmental Pollution 1) Identify Type One a) Causes b) Treatments c)

Effects on ecosystem health) Effects on human health 2) Identify Type Two

a) Causes b) Treatments c) Effects on ecosystem health d) Effects on human

health 3) Identify Type Three a) Causes b) Treatments c) Effects on

ecosystem health d) Effects on human health c. Global Warming 1)

Background a) Describe the Earth's atmosphere. b) Describe the Earth's

energy budget. 2) Global Warming Concepts a) What makes the Earth warm?

??? Explain the greenhouse effect. b) What natural greenhouse gases are

associated with the greenhouse effect? c) What anthropogenic greenhouse

gases contribute to global warming? 3) The Future) Predicted climate,

weather, and ocean changes of increased global warming b) Potential

environmental, ecological, and societal effects from increased global

warming c) Provide evidence that supports or refutes increased global

warming predictions and effects. 4) Prevention a) How might global warming

be mitigated? b) What can you do to decrease the effects of global warming?

c) What political constraints might influence decisions on global warming? d)

As a global society, how can nations and individuals influence policies and

practices to mitigate for increased global warming?
