true or false

the definition of educational technology as " the theory and practice of design, development, utilization, management, and evaluation of processes and resources for learning." was developed by

- a. ISPI
- b. NETS-T
- c. AECT
- d. ISTE

c. AECT Gardner's theory of multiple intelligences relies on the innate differences in the races to help identify the learning styles for students

true or false

False.

it relies on the theory that there are many different kinds of intelligences and that we need to recognize more than verbal and mathematical abilities as part of intelligence.

if a teacher asks his students to gather info that supports creationism and also to gather info that supports evolution as theories of creation, he may be trying to help students learn while avoiding distortion due to the students' unconscious use of

- a. learning styles
- b. telepathy

c. crib notes

d. filters

d. filterscognitive styles refer to the individual's tendencies and preferences in relation to thinking.

true or false

trueenvironmental factors, psychological factors, and personal filters can impede learning.

true or false

truetoday, educational technology typically is considered to include

a. print, models, and manipulatives

b. only digital media

c. all types of learning resources and the systems needed to use them

d. primarily audio and visual media

c. all types of learning resources and the systems needed to use

themtechnology is considered to be a means to an end and not an end in itself.

true or false

truelearning styles are a collection of preferences related to how one learns

true or false

trueboth cognitivists and constructivists recognize learning as a mental process an example of a psychological barrier to effective communications is the failure of the teacher to provide for individual learning styles

true or false

true musical intelligence, spatial intelligence, and kinesthetic intelligence are but three of the nine types of intelligence postulated by Gardner the cognitive preferences of extroversion, sensing, thinking, and judging are an essential part of which of these instruments?

- a. 16 pf
- b. MBTI
- c. MI
- d. ILS

b. MBTI if an instructor assigns gifted students a long-term project in which they can select to videotape their construction of models, conduct interviews, design display booths, or record informational audiotapes, the teacher is striving to accommodate: e. different learning styles thomas edison predicted that the movie projector would replace teachers.

true or false

true social constructivism is a perspective on learning that suggests learning is: d. the result of the collaboration of learners to construct knowledge the collection of theories that suggest learning is a set of acquired behaviors in response to rewards, punishments, and withheld responses is the perspective held by: b. behaviorists your purpose in studying educational

technology is to: a. acquaint you with technology you can use to teach and help your students learn the theorist best known for the multiple intelligence theory is: a. howard gardner jean piaget, one of the early constructivists, identified key developmental stages that effect learning.

true or false

true media refers to different means of communication.

true or false

true asserting that children build cognitive structures during all developmental stages makes piaget a: a. constructivist any prediction that a new technology will replace teachers is generally considered to be unrealistic.

true or false

true early CAI has evolved into: c. multimedia software in the communication process, which of the following is NOT one of the 3 major variables that can interfere with the communication of ideas?

- a. environmental factors
- b. psychological factors
- c. personal filters
- d. physical factors

d. physical factors NETS standards define how networking should be used in schools and across districts.

true or false

false.

NETS-T project describes what technology-literate teachers should know and be able to do with technology

the 2 major national organizations that have set standards and definitions that reflect the need for educators to have a solid command of educational technology skills are: a. ISTE and AECT instructional messages sent out by the teacher may be distorted by the belief system held by the student. this would be an example of a personal filter barrier to effective communication.

true or false
