“ The Art of Working is aiming high, working hard and giving big....

“ I am very thankful for providing me this opportunity and it is with sincere sense of gratification that I am writing my brief Statement of Purpose. Striving for success and improvement has been my motto in all aspects of life and the same applies even to my professional and academic career. A work experience of about 3 years in the banking sector has developed a strong skillset and a desire to establish a career in the field. In the complex and interconnected world of international business, the science of information management is increasingly important and entitles one with ultimate authority. I am very excited at the prospect of devoting my long-term career to such a dynamic, fast advancing field. Therefore, to pursue Master of Global Management is the ideal next step in augmenting my skills and knowledge. I am currently working at Doha Bank, one among the largest private commercial bank as a Personal Finance Executive. I enjoy working at my firm due to the wide variety of roles that demands direct interaction with the clients for various financial instruments and services provided by the bank which emphasize to work on stringent timelines. My schooling was completed in SIDDHARTHA HIGH SCHOOL, a standard institution with sound principles of education.

Theoretical and practical education provided a firm base for my academic life. Right from my childhood I had developed a penchant towards science and mathematics. I have secured 84.2% marks in my 10th class, scoring 97% in Mathematics. My ceaseless efforts and strong will power earned me valuable marks/grades, of 89.

4% in Intermediate level with Mathematics, Physics and Chemistry as majors. Upheld with a good rank in the engineering entrance exam (EAMCET), I got admission into KAMALA INSTITUTE OF TECHNOLOGY AND SCIENCE; Warangal affiliated to Jawaharlal Nehru Technological University, which is one of the finest institutions in imparting Engineering education in India. This has given me a comprehensive exposure to the core areas of Computer Science which made me to look forward to further improve my knowledge in the field of Computers what I was anticipating in my undergraduation. I am happy with the challenges faced and changes made to my academics to improve myself with a satisfactory mark. It taught me "The Art of Working" aiming high, working hard and giving big. The pride to be a successful academic professional is another aspect that has been encouraging me and providing the self-confidence in giving my best.

The basic undergraduate courses like Software Engineering, Data Structures, Computer Networks, Information Security, Computer Organization and Operating Systems have given me a sound foundation in the Computer Science domain. My academic pursuits have not however prevented me from participating with interest in various co-curricular activities including serving as representative of the class. Apart from having the academic proficiency, I was actively involved in extra-curricular activities and sports, right from my schooling. I was at the forefront in organizing various departmental activities. I have also attended some of the symposia conducted by other engineering colleges in the state. Few paper presentations on my areas of interest also worked in gaining cognition. So, I am confident of being a capable and make out student to accept the challenges in the approaching season.

These activities have led to the development of a multifaceted personality and have equipped me with strong interpersonal skills. I enjoy doing investigative and innovative work, especially when it leads to practical applications. Further I state that, I bear a moral character and behaviour, and I am a socially moving individual and I can work with any group of individuals without inhibitions. I aspire to pursue Master of Global Management because of my strong interest towards Management and its application to business settings. I have seen how Management can serve as a bridge between technology and business by supporting its planning, operations and critical decision-making.

Now through this program I desire to refine my skills and deliver technology-driven business solutions for global organizations to meet their strategic objectives. Through my academic and professional experiences, I have found that, in order to further increase myself as an asset to the business industry, I need to pursue coursework in Business Management that examines the fundamental principles of business which ideally suits my personality and aspirations. If given the opportunity to join your MGM program, I will be able to utilize my extensive background in Management, while learning additional skills and techniques that will be greatly beneficial to my future career development.

I hope to use my skills and background to learn how to effectively analyze and solve business problems. Modern businesses are heavily reliant on Management systems, and this is integral to the successful management of an organization. I am eager to explore this field in the presence of the esteemed professors at your university. After researching your program, I am
