

"big bot. an accident
caused on the same

**ASSIGN
BUSTER**

"BIG HERO 6" is a production of Walt Disney Animation Studio. The movie is based on a lesser-famous Marvel Comic. It idealizes the tale of superhero robots. This story revolves around a teen, who has completed his high school and is now wasting his ability on illegal robot fights, for which he gets in trouble with.

An opportunity given by the robotics institute, Hiro grabs it and creates an extraordinary mega bot. An accident caused on the same day by an inexplicable fire catalyzes the events of the film. This made a thorough change in Hiro's life. Hiro and Baymax (Tadashi's robotic nurse), leading Tadashi's best friends to stick together to investigate the accident and catch the real offender. By using their robotic techniques, they get ready to fight against the Kabooki mask man. Hiro summoned professor responsible for the death of Tadashi's death but Callaghan (mask man) impersonally responds by blaming Tadashi for his own death. This turned Hiro in a state of fit of fury. Hiro was blinded by hatred and grief.

He ejected Baymax's healthcare chip and inserted another chip, leaving Baymax on a program of fights and obliteration. This event was a game changer in Hiro's life as he learned that nothing could be achieved when one is furious or frustrated because Callaghan escaped. When Hiro leaves in fury leaving his friends behind, it shows the audience the impact of one being in alone and isolated when angry. Hiro then later apologizes to his friends and realizes no one can achieve something without a strong and supportive team. This creates an impact on the audience about one maintaining their anger and having self-control or it would lead them being isolated. On the other

hand, this creates an impact that one can never stand anything against their dear ones, no matter if their acts were justified or not.

This shows that Hiro selflessly love Tadashi and would do anything to have justice for him.
